Update For Version 1.2.2

OP gave me a copy of the updated eBook a few days back and I thought I would then make a short and sweet update to this review accordingly.

Now the update improves a lot of things and only makes the eBook better in my opinion. OP has now added an option for lower risk betting that was not previously there, so that people like me who like to minimize risk can take advantage of that. And of course, it is never bad to have choices no matter. Also, OP has added more and better screenshots in his guide, while also adding links to the screenshots so you can see them in bigger size if you want to do so. On top of that the update also just adds more information across the board. You are now given more info on how you can scale and diversify with this guide, so you can earn even more. OP has also added more info in the tips and tricks section that was not there before, meaning it is just that much easier overall to understand and apply everything OP is trying to teach you. Overall this seems to have been a very good quality update and I am sure he will continue to improve the product over time ?

(May 13, 2018 06:07 PM)Death111 Wrote: [\[CITE\]](#) Bought the method, followed it and within about 4 hours started the method to make profit. Running two sessions and making .00090417 BTC an hour per session (7.79 USD). Each session used 0.0115 BTC (~100 USD) startup investment. Earning ~15-16USD an hour. Like the thread states its low-risk but you still can lose your investment. I'd vouch for this method its fairly simply to setup and if you have even a small bit of luck you'll start to see profit.

Hi there, if you add me on Skype or Discord, I'd be pleased to give you a vouch copy.

Price has been lowered to \$25.00 as a flash sale (1 week) to earn vouches and reviews!

test - May 5, 2018, 11:53 pm

A pretty common method but as OP says it is not saturateable. It does involve gambling so there is obviously a very small risk involved but the method does provide tips to minimise losses. The method does an extremely good job of walking you through step-by-step to fully automate the process. The only part I personally disagree with is the price. It is a little bit too high in my personal opinion but that is up to the discretion of OP to change if he wants to and for you to judge. Depending on your initial investment however you could easily make this back within a day or less. Once you have made back your initial investment and purchase price this method is 'essentially' risk free since you are using pure profit.

Good luck with the sales.

*After a quick conversation with OP I convinced him to lower the price for a short period. I'd suggest anyone interested in this take advantage of the half price sale.

This has nothing to do with buying and selling things to make money, it's a gambling strategy and goes in depth with some things. You can check out reviews if you're worried. My post count isn't indicative of my knowledge and experience in sales.

Hello! If you have any knowledge of BTC regarding sending and receiving transactions, this method is for you! You don't need to be a blockchain expert. If you purchase this method, I can help get you started with knowledge of bitcoin transactions if you need it.

As for PayPal, I'm looking into setting up my account but cannot accept it at this present time. Please allow me 2-3 days to get this working properly.

Going to be a little more in-depth. I have now been using this method for a full day. It has made me profit. Not fast, but a couple dollars an hour. Of course, I am only using a small investment. Using a larger amount I could easily see this doing 100+ a day.

It is auto-pilot. For a small safety measure, you can check in on it every few hours. Other than that, it just does its own thing.

No hard requirements aside from at least 0.005 BTC to start. Singaporeans might have difficulty due to bans in their country, but it can be bypassed with an RDP. At least 2 GB of ram and Windows are required for the machine you decide to run this on.

*Purchased on May 8th. Started using the method this morning (May 9th) and for the past 5+ hours I have made back what it cost to purchase this method.

My review probably does not mean much as I am a straight up lurker that joined Jan 2018 with barely any posts/reputation. If you can disregard that, then read on.

Communication: Great communication over Discord group/PM. Have had my questions answered either on the spot or within a couple minutes.

Setting Up: This is really easy to setup and it took me about 10 minutes + a 1 hour mandatory wait time (part of the steps) to get everything ready to go. The 1 hour is just a waiting period and you just have to wait it out and don't have to do anything.

Profitability & Scaling: After 5+ hours I have made back the cost of this method and then some. I am currently at \$10 an hour on OPs recommended preference in terms of safe scaling, I am using my own bankroll amount (initial investment) though.

Saturation & Long Term Use: Like OP said, this method cannot be saturated and is not using any "exploit" or cheating any system. It is all fair play. If you follow the OP preferences/recommendations

in terms of your initial investment and scaling potential; you will profit in the long term no matter what.

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [Bitcoin Machine - Earn \\$25-\\$150+ a day! \[Autobuy | Autopilot | Reviewed | Mentoring\]](#) by "Nimiq King"

This eBook consists of 1 method and 9 pages.

Before I get into the method I will as always talk a little about the other aspects of this eBook. On the grammar part of things, I saw minimal errors and the entire guide looked pretty spotless overall. The design is clean, it has good illustrative screenshots and it is very easy to read through.

Now as is obvious this method is centered around bitcoin. More specifically this method is about crypto/bitcoin betting. the entire eBook is as I mentioned only 9 pages long, but as the steps are short, concise and to the point, you really don't need more than that. As OP says on his thread you will need an initial investment for this method. The amount you put in is purely your own decision depending on how much you want to "risk". But as is stated in the thread it is recommended you start with at least \$50 worth of BTC. This is to ensure you can get some fast and decent profit with the method, and not make 10 cents a day etc. Outside of this initial investment you will not need to put any more money in, as you will start raking in your first profits within a few hours.

After you have set up your accounts on the website you are going to use and downloaded the programs and scripts needed, you are basically set to start earning right away. Now of course as this method is revolved around betting, it is theoretically possible you lose 100% of your initial investment. Now naturally this % chance is so unimaginably low it should not ever happen unless you are the unluckiest person in the world. But it is nonetheless a possibility, so you should keep that in mind.

The setup time of this method is very, very short. You can get it all done in 10 minutes and then be more or less done with all the work. You will need to wait an hour after first setting everything up, but after that you can start earning right away. You can earn a lot with this a day if you scale it properly, and take use of the tips and tricks OP has provided in the eBook as well.

As is stated in the thread, this method is also more or less 100% autopilot. After the initial short setup, you can basically just let it run on its own, just check on it a few times a day and that's it. Now of course if you want to optimize and scale this method, you will have to play around a bit with the math of everything and figure out the optimal strategy. OP can also help you with this if you can't figure it all out yourself.

Now as I mentioned earlier OP provides a few tips at the end of this eBook. He tells you about how you can scale and optimize your profit, how to make sure you never lose all your investment, how to secure your profits and how to keep track of everything.

The contact I have had with OP over PM's about support and questions has been very quick and proper. All the questions I had and everything else was answered in a quick and timely manner. OP's support seems quite HQ, and I am sure he will help you in whatever way you need if you ever get stuck with how to set this all up, or how to scale it etc.

The pricing of this eBook at \$25 I feel is also overall fair. I don't think OP should charge more than this though, as you will need some initial investment on top of the eBook price itself.

The only half way negative thing I have to say about the eBook, is that I personally would have wished for bigger images overall. To me the screenshots displayed in the guide showing all the steps, are a bit too small for my liking, and I feel it is not always the easiest to see all the details depicted. I would advise OP to perhaps enlarge the screenshots a bit, or perhaps even take some higher resolution screenshots to begin with. This is again just my personal preference though and not something that takes away from the value of the product.

Final Thoughts

To OP I would suggest you, as mentioned above, look into the screenshots to perhaps improve them a little here and there. Other than that, I really don't have much to complain about at all. Good work on the eBook ?

This eBook is a fairly good one I would say, with a lot of earning potential, and not at all a lot of needed work. If you have little free time but want to get some extra cash, maybe even a good amount of extra cash, mostly on autopilot as well, then this is a very good eBook for you. The people that do crypto betting on here might be familiar with this method in general already, but it is at least not something I myself have seen much of at all in the past. The pricing for this product at \$25 is also fair, and I think you will easily be able to get your investment back within the first week. Again, as I have said before, this is a betting method so there is always an inherent risk involved, no matter how small it may be, so take note of that.

This is a simple, straightforward method, that is easy to set up, easy to use, and will most likely net you a good amount of profit ?

Update For Version 1.2.2

OP gave me a copy of the updated eBook a few days back and I thought I would then make a short and sweet update to this review accordingly.

Now the update improves a lot of things and only makes the eBook better in my opinion. OP has now added an option for lower risk betting that was not previously there, so that people like me who like to minimize risk can take advantage of that. And of course, it is never bad to have choices no matter. Also, OP has added more and better screenshots in his guide, while also adding links to the screenshots so you can see them in bigger size if you want to do so. On top of that the update also just adds more information across the board. You are now given more info on how you can scale and diversify with this guide, so you can earn even more. OP has also added more info in the tips and tricks section that was not there before, meaning it is just that much easier overall to understand and apply everything OP is trying to teach you. Overall this seems to have been a very good quality update and I am sure he will continue to improve the product over time ?

The only half way negative thing I have to say about the eBook, is that I personally would have wished for bigger images overall. To me the screenshots displayed in the guide showing all the steps, are a bit too small for my liking, and I feel it is not always the easiest to see all the details depicted. I would advise OP to perhaps enlarge the screenshots a bit, or perhaps even take some higher resolution screenshots to begin with. This is again just my personal preference though and not something that takes away from the value of the product.

Final Thoughts

To OP I would suggest you, as mentioned above, look into the screenshots to perhaps improve them a little here and there. Other than that, I really don't have much to complain about at all. Good work on the eBook ?

This eBook is a fairly good one I would say, with a lot of earning potential, and not at all a lot of needed work. If you have little free time but want to get some extra cash, maybe even a good amount of extra cash, mostly on autopilot as well, then this is a very good eBook for you. The people that do crypto betting on here might be familiar with this method in general already, but it is at least not something I myself have seen much of at all in the past. The pricing for this product at \$25 is also fair, and I think you will easily be able to get your investment back within the first week. Again, as I have said before, this is a betting method so there is always an inherent risk involved, no matter how small it may be, so take note of that.

This is a simple, straightforward method, that is easy to set up, easy to use, and will most likely net you a good amount of profit ?

Thank you kindly for the fantastic review! I will be sure to address the issues you and others have pointed out in the updated v1.2 coming out soon! ?

I can't "guarantee" a return in short-term, this method is meant to be beating odds long term by using a low-risk factor(s). (<0.000xxx%) You get to choose which risk factor you want to use. If you need more information, please send me a private message.

Hi there, I have private messaged you. An update 1.2 was pushed last night that had Google Docs destroy my links. I pushed an updated 1.2.2 that should be a .docx and will have working links. I apologize for this delay!

Hi Gameh3x, I do not know which questions you are speaking about (unless you are user Pug420). Your demand for answers to your questions may have been met, and you must realize I need to sleep every once and awhile. Thank you for your patience!

Theocritus - May 11, 2018, 10:52 am

Here are my earnings as of today. I started running the method last night, then for some reason it stopped while i was sleeping so i started it up this morning. i suppose it's been running 10 hours total now i think, and i've already made back around half of the ebook cost

this is all made with no optimization and with the base setup that took only 10 minutes

(May 12, 2018 11:05 PM)ice2893 Wrote: [\[CITE\]](#) Your method is with betting site?
That is correct. We use mathematics and guidance on how to beat the odds in the long run.

Our thread design has been updated as well as the launch of new tiers!

You can now choose "Basic", which is just the guide straight across with no full support. You can seek help in our Discord Channel if you need it, but your priority is lower than those who have higher tiers.

Then we have "Supreme" which is what has been available for the last week, plus our new contest/giveaway system.

Finally, we have "Platinum" which includes everything plus a free Windows RDP!

Come join the Bitcoin Machine community and start making profit!

Gameh3x - May 13, 2018, 3:39 am

Wouldn't recommend buying. This method is a total fraud and you are not beating the odds in a long run at all.

Puts you in a discord group with betting addicts who believe this actually works and keep sinking

more money in.

This is not true. As long as you are not greedy and do it wise, you'll profit out of this.

Plus, in the discord group you'll find chill people that are always available to help you.

ice2893 - May 13, 2018, 10:21 am

No you fucking moron, people are losing money left and right. Gambling is mathematically unprofitable because of the house edge. No amount of x strategies or dicing bots will help you in the long run.

Dont buy this shit.

Your attitude is piss poor for someone who was graciously refunded despite opening a ticket on PayPal before I could even respond. My question is why did you purchase and then proceed to use the method if you're so pent and sure that it wasn't going to work? There's been multiple people that have continued to profit.

Furthermore, putting in the bare minimum, losing, and then trying to repeat the process with even less than the bare minimum is going to slaughter you. This is mentioned in the guide SEVERAL times. Take your refund and piss off, unless you want to leave an actual review instead of attacking happy customers. Thanks! ?

So how much is the minimum to invest where the risk of losing the initial investment is greatly minimized?

Hi! Thank you for your continued interest. The minimum is 0.005 BTC for minimal risk, but the best

for profit/minimal risk is 0.007 BTC.

Death111 - May 13, 2018, 6:07 pm

Bought the method, followed it and within about 4 hours started the method to make profit. Running two sessions and making .00090417 BTC an hour per session (7.79 USD). Each session used 0.0115 BTC (~100 USD) startup investment. Earning ~15-16USD an hour. Like the thread states its low-risk but you still can lose your investment. I'd vouch for this method its fairly simply to setup and if you have even a small bit of luck you'll start to see profit.

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Update For Version 1.2.2

OP gave me a copy of the updated eBook a few days back and I thought I would then make a short and sweet update to this review accordingly.

Now the update improves a lot of things and only makes the eBook better in my opinion. OP has now added an option for lower risk betting that was not previously there, so that people like me who like to minimize risk can take advantage of that. And of course, it is never bad to have choices no matter. Also, OP has added more and better screenshots in his guide, while also adding links to the screenshots so you can see them in bigger size if you want to do so. On top of that the update also just adds more information across the board. You are now given more info on how you can scale and diversify with this guide, so you can earn even more. OP has also added more info in the tips and tricks section that was not there before, meaning it is just that much easier overall to understand and apply everything OP is trying to teach you. Overall this seems to have been a very good quality update and I am sure he will continue to improve the product over time ?

Thank you very kindly for your updated review! I'm very glad to hear that your thoughts on v1.2.2 are overall a much better guide. ?
