Thread: [How To Setup OPENVPN Tutorial](#)

G0dzSoldiers - May 6, 2018, 1:36 pm

Have you ever wanted to manage your own VPN/logs ?

Well Here is a Little Tutorial on how to get started - requirements A VPS / With or With out DDOS Protection - DDoS Protection Recommended.

Where do I get a DDoS Protected VPS Well Most VPS providers Provided this but you can use ovh.com nfoservers.com Or Others!

Getting Started -

Code Wget the openVPN Installer : `wget http://www.godz-soldiers.xyz/openvpn-install.sh; chmod +x openvpn-install.sh`
Next we want do run

Code `./openvpn-install.sh`
you will see something like this <http://prntscr.com/jej6l2> then press enter Keep Default Port 1194 Press Enter again
Now Select The DNS you want use i Chose 2 Google DNS <http://prntscr.com/jej7cm> then press Enter again now its gonna build
Once its down installing it will look like this <http://prntscr.com/jej8go>

Now run this command here :

Code `ps ax|grep openvpn` If it worked you will see this <http://prntscr.com/jej97e>

Then Run this command here:

Code `sysctl -p /etc/sysctl.conf` it will look like this <http://prntscr.com/jej9ru>

Last command to run :

Code `iptables -t nat -A POSTROUTING -s 10.8.0.0/24 -o eth0 -j MASQUERADE`

If you want to turn off Pings or back on again run

Code `## turn off`
`sysctl net.ipv4.icmp_echo_ignore_all=1`
`## turn back on`
`sysctl net.ipv4.icmp_echo_ignore_all=0`

An save `sysctl -p`

Now if you dont have the openVPN Client Go Here :

<https://openvpn.net/index.php/download/community-downloads.html> Pick the Software compatible with your Operation system

Once that's done Transfer the Ovpn Config to the config folder in OpenVPN (usually in "C:\Program Files(x86)\OpenVPN\config").

G0dzSoldiers - January 3, 2019, 8:39 am

bump Wget the openVPN Installer : wget <https://pastebin.com/raw/J3THPXsv> -O openvpn-install.sh
; chmod +x openvpn-install.sh -- old link dead

Leroy Jethro Gibbs - April 10, 2019, 5:41 am

So this shit working now? Yeah I'mma grave dig because this information is useful to me.

Look like a re-branded old code from

<https://github.com/angristan/openvpn-install/blob/master/openvpn-install.sh>

Same name and some part are looking the same too.
