Thread: [Bottos - Decentralized AI Data Sharing Network "Holy grail of AI development"](#)

shredder - May 7, 2018, 5:31 pm

Bottos | Decentralized AI Data Sharing Network

Bottos is a decentralized infrastructure that focuses on artificial intelligence. It is designed to be a consensus-based, scalable, easy-to-develop, and synergetic one-stop application platform for data, model, computing power and storage capabilities through data mining and smart contracts. Bottos has a bottom-level public blockchain specially designed on the basis of data characteristics as well as a platform for data circulation among different participants within a broad-based AI ecosystem.

Where to purchase Bottos(BTO)?

GateIO

Bibox

Coinegg

More coming soon...

Token Allocation

12% - Founders

15% - Private placement

37% - Community

36% - Public Crowd-funding

Current Roadmap

November 2016: the BOTTOS project launched

July 2017: the White Paper and DEMO released

November 2017: Beta version to be released in Chinese and English

December 2017: Crowd sale to be launched

January 2018: BTO to be traded on exchanges

March 2018: the testing network to be launched

May 2018: the main network to be launched

Xin Song, the co-founder and CEO with 13-year experience in high-tech investment, corporate strategy and digital transformation field. He was the head of Droege Group China, a Europe based investment firm with 10 billion EUR AUM during 2012-2016. Prior to that he worked for Liberty Mutual and Accenture in US as a senior consultant. Xin holds MBA from Georgetown University and BS in Management Information System from Shanghai University of Finance & Economics.

XinSong Twitter https://twitter.com/XinSong_Bottos

Chao Wang, Co-founder and CTO with 20-year experience in product development. He assumed the CTO role at Wanxiang Blockchain Lab and Principle Architect at Huawei Technologies Co. Ltd prior to Bottos, which are two top research companies in blockchain and mobile communication technology in China. Chao is the decision committee member of 5G mobile communication technology in China. Chao holds BS in Computer Science from Hefei University of Technology in China.

What is the difference between Bottos from its other 'competitors'?

Bottos is a all-encompassing AI development accelerating ecosystem. Meaning it covers a broad range of tools vital to AI development that is currently a bottleneck for AI development. Meanwhile competitors do not focus on removing such bottleneck's nor do they have such a comprehensive ecosystem like Bottos.

UPCOMING- looking for long term hidden gem? better than me then.
