Thread: [Theocritus' eBook Review for "Money Maniac" by Bluffer](#)

Theocritus - May 8, 2018, 5:48 am

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [MONEY MANIC | YOUR GUIDE TO NO BULLS***T MONEY MAKING! | STARTING @ ONLY \\$23.00](#) by "Bluffer"

This eBook consist of 3 methods and 16 pages.

Before I get into the actual methods I will as always talk a bit about the design and grammar of this eBook. Grammar wise the eBook is pretty alright, I didn't see too many errors overall. What I would like to comment on though, is the apparent lack of proper punctuations and periods in some places in this eBook. There seems to be certain sentences that completely lack periods, meaning they are very long and often make you quite confused, as there needs to be a period or punctuation there. You should take a look at that.

On the design side of things I really don't have too many things at all to mention. It looks clean and professional, and it is very easy to read over and understand overall.

Now onto the methods in this eBook. As noted above there are 3 methods in this eBook and I will talk about them all chronologically below.

Method 1

The 1st method is just a reselling method. This is a very generic method many of you most likely know already, and that has been mentioned in tons of other eBooks as well at this point. The method goes through the steps, setting up your account on this and that website, where to find products to resell, and so on and so forth. I would actually have liked it if OP provided more details on the actual selling of the products, as I did not see him mention the fees associated with each sale and just how the site works in more detail etc. This is a section I feel OP can talk a good bit more about just to really explain all the things around it more properly and fully.

The only real unique thing about this method are the few tips that OP gives you when it comes to choosing what products to resell, and where to find potentially good products to resell in general. These tips aren't revolutionary or anything, but they can help you make some extra money over time. If the eBook only consisted of this method then it would frankly not be worth the purchase in my opinion. Thankfully that is not the case.

Method 2

The 2nd method is yet another reselling method. This method is also a fairly generic one. I have seen this method in many an eBook before, and I didn't really see much original content in this at all either. What you will be doing in this method is reselling, more specifically reselling within the online genre. Most of you can probably already guess what this method is all about, as it is largely common knowledge for many at this point. You are given a general idea and guide on where you can find suppliers for the services you will resell, generally how you can price it and so on and so forth.

Sure, OP provides a “step by step” guide on how to set this up, but there is really a lot of information missing that he should really put in there to make it more original and to really try to up the value of this eBook. As it stands I see no real original content in terms of this method, as this can be fairly easily obtained if you search around online and/or if you have already acquired the “knowledge” from another eBook already. Also, at the start of this method OP says he chose this as the first method in the eBook because of its simplicity, even though it is the second method mentioned. OP, you should probably look at that. I feel OP should also really have included more of a detailed step to step guide with this method, as the people that would not know about this already will most likely need more guidance to get it all set up.

Overall this method is nothing new and has been rehashed in eBook after eBook for years at this point. Can you make money with this? Sure, you can. But I would really have liked an in-depth tutorial or at least something new and somewhat unique to differentiate this method from all the others. Sadly, I did not see much of that in this one.

Method 3

The 3rd method is the first method that is actually half way original. This method is based around commissions and how you can make money by getting people to buy certain products via your affiliate/referral links etc. Now of course OP has a specific guide on how you should go about doing this and getting people to buy the product you are wanting to sell. I am naturally not at liberty to say exactly how you do this as that would spoil too much about the method.

This part of the eBook had the most errors with punctuations, periods and just sentence structure in general. OP should really look over this section and fix these errors here and there.

Once again as with the above methods, OP provides a good step by step guide on how to get yourself set up with this method also. The step by step guide is alright overall. You are taught how to do each step, how to rank yourself higher to get more traction and in the end more commissions with the products you are trying to sell and so on and so forth. OP provides some nice tips here and there as well on how to optimize the process which will in turn lead to more revenue for you. This method is by far the most time consuming one though, and I can see it taking at the very least days, but more likely a week or two before you see your first revenue from this. This method requires a good amount of work to start rolling, but after a few months, when you have built yourself up on the platform mentioned then sure you can start generating some nice overall passive income. The main negative thing with this method though is that I found no real info or suggestions on where to find these products to sell via referral/affiliate. I didn't see any site mentioned for finding products, or much info in the way of how to actually set up your referral links, sales etc. the other steps are explained well enough but I feel there is a gaping hole for another step containing much more info on this specific part of the method.

At this time it seems like this method would take a good amount of work to get rolling or even set up in the first place. Based on this I don't know if it is the best method for most people to try out unless they have a massive amount of free time. It can work, but it seems like a lot of effort needed to make it all work properly. It also seems like this method will require you to do some work yourself with research and such, which I would kind of expect more info on in the eBook itself, as you have paid to be fed with all the information needed to have it all working 100% so to speak.

This method seems decent, but it could really use a makeover to come close to being really great.

Final Thoughts

To OP I would suggest you fix all the grammar, punctuation and period issues in your eBook. I would also advice you to add much more detail to each method, as these methods are more generic

and would only really have much value for newer members that are very clueless about the industry etc. These people are the ones that would need the most guiding and help as well, meaning there is even more reason to have more detail put in.

To me all the methods are somewhat lacking in detail, but yet they are the most useful to the newest members and the people with the least knowledge about the subjects and industry as a whole. So yes, I would really advice you to take a look at all of that.

If you are looking to buy an eBook with brand new ideas or very original content then this is not the product for you. Most of the methods covered here are already known to most of the more long-time members and veterans of the industry. To me this eBook will only have a lot of value to the newest members and "newbies" of the industry so to speak. If you are brand new to Hackforums and want to find a good beginner eBook to perhaps start making some money then this is the kind of product for you. The pricing of this eBook is fair, but it will only bring much value to newer members, in my opinion anyways.

Thank you for the fantastic review! I've been looking at a handful of Ebooks lately, this being one of them. I'm happy to now know that these are all basically the same methods that most of the other Ebooks that I've acquired, have in them.

I don't know what I would do without this group reviewing! Lol.

"The 1st method is frankly just a game reselling method."

isnt that considered leaking the contents of an ebook?

i had this discussion with bluffer as well. but as this method is so well known and it to me is only mentioning the category of the method i would say no. On the border though

Bluffer - May 11, 2018, 6:04 pm

The method is NOT WELL KNOWN it is just the site we sell on that is known. I think you just need to remove the post this is ridiculous.

I have contacted divined about it. He will have the final say on the subject.

I am confused on why write a whole new thread instead of posting on OP's thread.
Also mentioning reselling is basically leaking the whole concept of the book

It is also of course mentioned on the thread itself as well. If simply saying reselling is leaking a method then that is unbelievably broad of a definition. Reselling can be so, so many different things, it really doesn't say that much about anything imo

Bluffer - May 11, 2018, 6:19 pm

Most reviews I've seen and believe me I've seen a ton and also written a tone will talk about the method but will never even broadly mention the subject of any of the methods. I totally think you did this on purpose too.

I've tried to be nice about this, remove the post and this thread and let's get on with this. Your review is absolutely pathetic and it absolutely is leaking my method.

I am in fact willing to offer more vouch copies and not many people have inquired but I will give some more out and you can see that they will review the ebook without talking about the methods.

And not to mention... WHY THE FUCK DO YOU NEED DIVINED's permission to remove your post? This is your account that should be affected on here since you are leaking ebook methods. It has nothing to do with the Appraisers group or Divined.

As i have already said i have contacted Divined about our practice when it comes to this. If you cannot even mention the broad category of a method you are reviewing then what can you even tell potential buyers? That its a method, that does this and that thing without saying basically anything that might help them make an informed decision?

Also did what on purpose? Write a review?
