Thread: [\[Release\]Aris' External Minecraft AutoClicker](#)

GangsterPlum - May 8, 2018, 8:19 am

This is an external autoclicker for minecraft pretty good to bypass screenshares etc
you can run it whenever you'd like, doesn't matter. only requires you to have the Minecraft window open

Download: [deleted]

iQuintennn - May 8, 2018, 8:38 am

Old autoclicker, most likely not to bypass

GangsterPlum - May 8, 2018, 8:40 am

If you use correct settings it will still bypass 99% of servers

OP is trying to use his .net crypter he bought 2 days ago.

This is just this:

<http://freesourcecode.net/vbdotnetprojects/35983/Saransh-Email-System-VB-2008-in-VB.net>

Repackaged with a java icon and some malware sprinkled in.
