Thread: [Can you downgrade to a lower iOS Version?](#)

luuca - May 8, 2018, 11:18 am

Hello fellow users,

I planned to buy an iPhone X in June, but i asked myself if its possible to downgrade from a higher iOS version to be able to jailbreak it.

Is it even worth it?

Can you help me with those questions? ?

Thanks in advance!

You can not downgrade an iPhones firmware unless the firmware is being signed still. Latest public jailbreak is for iOS 11.0-11.1.2. iOS versions currently in signing field is 11.3.1 only for iPhone x which is non jailbreakable [Source for firmware's signed](#)

You can only downgrade to signed ones.

For example, you can't downgrade to iOS 10 now, only to 11.3.1 (which is the latest iOS as far as I'm aware).
