Thread: [R2Games Database \(confused about encryption method\)](#)

lanciano - May 8, 2018, 9:06 pm

Hey guys, I was searching through the R2Games database and I found an account with good use. I'm assuming this is a new addition as I have the full version and one with 2.1 million yet this wasn't in there.

The hashed password is 15e068e2fe142455c127f58e060cd5c7, salt is 0Nu1YK.

Thanks so much for the help. ?

How did you manage that?

Could you possibly decrypt this one:

d21ea9b249d511cfb1b4fe5e9559de6e

Salt is 8bGBIT

Thanks!

the rep as not come from any password service what so ever.
I dont have to proof nothing to you.

Here you go, yes I can post old passwords: Possible abuse/webscraping/botting on HF.

100% they are not all coming from a hash finder service.

you need to read the help doc.
posting etiquette rule breaching.
Also harassment, slander calling me a scammer.
Spamming.

So why don't you tell others which passwords you pasted aren't cracked by you.
I will answer - because they all come from a free finder. You only do copy / paste.
You should show some ethics
