I've decided to sell my private and therefore extremely limited Adwords method which makes it able to create Unlimited (really unlimited) Adwords accounts with a \$5,000+ budget.

I'll be selling 5 copys in total to avoid saturation.

The method is NOT the fake iban method which gets your account down within an hour like others on HF are selling.

Refund Warranty: If you aren't able to create Adwords accounts with a \$5,000 budget you'll receive a full refund. - You also receive a full refund if an account gets banned within a week after setup or if the method gets outdated/saturated within a month after purchase.

Price Copy 1: \$550

Price Copy 2: \$650

Price Copy 3: \$750

Price Final Copy: \$750

Payment Methods: Bitcoin, Ethereum, Litecoin and other cryptocurrencies.

I'll be willing to accept Middlemans if fees are for you INSTEAD of discounted copys and refund

warranty, price will be at \$1,500 with no refund warranty then.

Let's see how this turns out first with the discounted copys and refund warranty though.

So it has nothing to do with virtual creditcards or stealing information at all?

Would you refund if it does?
