Thread: [A robot that can run and jump!](#)

PurlieuServices - May 10, 2018, 6:41 pm

The company Boston Dynamics has a built a bipedal robot that can run and even jump!

Walking on two legs has been extremely difficult for robots, but I guess this one has mastered it!

This is really cool, I guess pretty soon here we'll have robots instead of a pizza man and robotic explorers.

hedge.funds - May 10, 2018, 8:20 pm

That's Artificial Intelligence For You!

CYB3RM4N - May 10, 2018, 8:24 pm

Pretty cool.

Can't wait till the plot of [I, Robot](#) manifests itself in real life.

Wake - May 11, 2018, 2:44 am

When It jumps over the log that shits just terrifying. Wont be long till they take over.

Smexy - May 11, 2018, 3:04 am

Robotic delivery doesn't require any tips.

Great future ahead!

Mr.Magnificent - May 11, 2018, 3:05 am

This is actually pretty scary in my eyes. It will only take time before someone will put a bomb on its back..

Shlazam - May 11, 2018, 4:09 am

Someones about to build a robot army and take over the world.

Creepy shit.

Vyxn - May 11, 2018, 4:34 am

Boston dynamics also has a robot that can flip. They do different robots with different ability.

Maybe they'll combine it all after a successful test.

Caliban - May 11, 2018, 4:37 am

Now they still gotta learn how to do a backflip

PurlieuServices - May 12, 2018, 10:55 am

Walking has always been tough for robots because of linear computer code that governs it's walking patterns, and because there are so many variables involved in the walking process.

Vegeta - May 12, 2018, 11:17 am

Robots are taking over the world man.

TB12 - May 12, 2018, 11:18 am

Terminator is becoming a reality, don't give it lasers please
