Thread: [iPhone 6 16GB 3 years old](#)

4tl3t1 - May 11, 2018, 4:37 am

Hi guys,

Should I jailbreak my iPhone? Why? I never been interested in jailbreaking it and i'm not very informed.

Thanks ?

?lex - May 12, 2018, 8:30 am

Jailbreaking is always a great choice! It can turn any iPhone into something better! You can also get some features even from the iPhone X. Obviously not hardware wise, but software. Still, a worth thing in my opinion!

Jailbreaking or not to jailbreak. Personally I prefer to keep mine unjailbroken.

Well I personally don't like to tamper with things. I believe that jailbreaking my phone would make it less legit, like it's not official anymore, and it's not the way that it's intended to be. That's the way I think about it. Also I don't wanna mess up my phone lol.

No offense to jailbreakers and I'm not saying it will mess up your phone, because it may not. But personally I just never took that risk and kept my phone unjailbroken.

Can you turn it on and off? Sometimes you just have to wait a little and the button will start working on it's own. Just charge it and turn it off and on and it could start working again.

(May 13, 2018 12:01 PM)4tl3t1 Wrote: [\[CITE\]](#) When I changed the screen because was broken i putted an unofficial (Big fail), and a year later the button stopped working, like one month ago.

I think the problem can't be solved. I think i will buy 100€ in BTC now and i will hold them 1 or 2 years. During the time i get a new phone i will use an old iPhone 5c.

If anyone wants to help here is my BTC adress :D 1NDWekecyfzLsiapLjGZHhNyqXJiZR2CZ
You can perfectly get the phone to work after resetting without home button I did it myself, what screen are you on when you turn the phone on?
