The method is pretty detailed, there is some risk involved of source.

There is indeed a lot of work needed to complete this method, and a lot of work-arounds you need to do but it's of source possible.

Needs a good amount of investment, but the return seems worth it.

Seems pretty unique.

Does this method involve betting under a different ip and then claim you didn't make that bet?

No, it involves betting yes. But its impossible to lose if you just follow the steps in the e-book.

Sent vouch copies around, and already got feedbacks. Thanks to everyone for purchasing. Feel free to ask me if you have any questions!

Product: [\[5€\] - Make money using bet365 - REFUND IF YOU DONT MAKE MONEY](#) by "Jinkow"

This eBook consists of 8 pages and 2 versions of the same method.

Before I get into the method itself I will talk a bit about the grammar, structure and so on. Now it is apparent this guide has a lot of issues with, well everything more or less. This eBook has many grammar mistakes, many cases of just very awkward and weird sentence structure, words that are in places mumbled together without making much sense and more. This guide seems to lack more or less any proof reading or quality checking. I can almost not read a single sentence without seeing something either weird or incorrect with the wording, grammar or just other general issues. The steps listed do not seem that easy to understand or follow overall, and they are sometimes not even in a proper chronological order. This entire eBook could use a massive restructuring and quality control check before being close to being called a "finished product" in my opinion. This is not helped by the fact there are no images to help you with the steps either. Also, in some places it seems like there is randomly like 20 spaces between sentences, for literally no reason. I just do not understand how you can not at the very least have fixed that...

Now onto the method itself. Well as I said this eBook has 2 versions of the same overall method. One of these versions are to me 100% blackhat, while the other one is fairly whitehat overall. At least in comparison to the other version anyhow.

Now what you will be doing with this method is obviously based on betting. You will use a certain

betting site and do a trick on it to ensure profit. It should also be mentioned both of these method versions require investment. The investment amount should be in the \$200-400 range, so do keep that in mind. At least you should get a good return on this right away, but it is still a fair bit to invest in the first place. As I said this method has 2 versions. The blackhat version of this method involves getting peoples ID's, or at the very least get ID "templates" and use them for a certain process. You are even told to go on the dark net to find sellers of these sorts of things or ask your friends for their ID.... Though no one should be that stupid or trusting, so it seems unlikely to work for most of you. Another just sad point is that OP provides no sources on where to get these on the dark net, so I suppose you will just have to search it? Now of course I am not able to mention much more with this as that would spoil the method too much, but I felt this was a very important thing to mention.

The other version of this method is much more whitehat and does not involve anything with other people's ID's. the process is mostly the same, as is the profit level. Again, you will need the suggested investment, and can expect the same return in the same amount of time. The only real difference is that it will take you a bit longer to withdraw your earnings.

Other than this you are given a few tips on arbitrage betting. these tips are nothing too special, but you are at least provided with some as well as some sites you can use for it. On top of this there are also some tips and info on how to do the method above in a better way, as well as how you can perhaps scale it and make a lot more profit.

The expected earnings with this is around \$300 per time you do the process, though keep in mind this will require \$400 in initial investment. If you do this 10 times a day, which is technically possible, you could be looking at some very nice earnings.

Though most of the things you will be doing with this method is not really illegal, it is 100% against the betting site TOS. So, if you are not careful, you can easily lose all your earnings in a second, meaning that \$400 investment just went poof and you are left with nothing. You will also really need 4 different devices to do this method effectively, so do also keep that In mind.

To me this method is very high risk, while also being high reward. This is not a method I would personally use as I think the risk is simply too high as you need a lot to invest initially, and any misstep can spell disaster. So, I would say only try this if you have more than enough money to spend, and not otherwise.

At the current cost this method might seem like a steal, but with the quality of the writing and the method included, I would frankly not say it is worth much more. This method is very cheap to pick up, but I would still be very cautious trying this out. As like I said before, that investment you just put in might go poof, and you will then not be a happy man, I can promise you that.

Final Thoughts

To OP I would say you need to restructure your entire eBook. Frankly there are so many errors with grammar, structure and just overall readability it is almost appalling to me. I know you are selling this at \$5, but that still doesn't mean you can sell a product without any proper quality control or grammar checks. If you fix all of this, then you can perhaps even increase the price of the eBook to \$10, though I think that is the max you should charge for this no matter.

If you are desperate for a new betting eBook and have a lot of money to invest, (\$400+), then and only then would I consider picking this up. There are also simply so many errors like the ones I stated above that many of you may have issues even understanding the entire method without help. This is a method that can technically work, and if it does you will make a lot of profit. But for me

personally it is simply too risky and not something I would try out myself. It is worth mentioning this method is at the very least quite unique.

You charging people to learn free techniques that are out there, MB is so common nowadays lol. Also you should mention 18+ in your OP.

Zombie [?] - May 16, 2018, 10:26 pm

Is it the two times bonus claiming method? Or, is it somehow related?
