Thread: [HF extremely slow recently](#)

Jimmie - May 11, 2018, 11:43 pm

Has anyone else had loading issues? In the past month or two HF has been loading extremely slow for me I use IPV6.

The forum is slow loading up and I have a 3-5 second delay when I click a thread or new post.

SIM-2026552 - May 12, 2018, 12:16 am

I'm not seeing any additional delay personally on my end. Is it possible you're having internet issues?

FamousHater - May 12, 2018, 12:17 am

na just u op

call internet provider and tell them hackforums.net is loading slow

they will fix

x222 - May 12, 2018, 1:35 am

its cuz ipv6 is slow , change to ipv4 way faster.

Deany - May 12, 2018, 1:45 am

It used to be slow for me, but now it's very responsive.

rob* - May 12, 2018, 2:17 am

Hasn't felt that way for me since I started using it again here recently.

Evanescence - May 12, 2018, 2:36 am

It's just you, HF looks faster from here.

Malevolent - May 12, 2018, 2:38 am

HF has been running just fine for me ever since that one night where it progressively got slower (like a week ago)

My pc and internet is fine it's a issue with HF.

Jinkow - May 12, 2018, 7:52 am

Actually the same happened with me, then i tried to turn on zenmate, then suddenly it works fine.

This happened to me also but it was fixed and everything is loading fast for me the same way.

pms - May 12, 2018, 9:11 am

i did notice some slowness over the last month but nothing that bothers me.

Thanks dude, this method worked for me! ?

@OP - Maybe this thread can explains some things? -

The forum is slow loading up and I have a 3-5 second delay when I click a thread or new post. I came back from a few weeks vacation and I feel that it is loading slower than usual. I thought that it was from my end.

Kotlin - May 13, 2018, 1:43 pm

I'm not having really any "extreme slowness" but I'm still getting those random Error 503. (About 1 in 10 chance of getting it now).

oRequiem - May 14, 2018, 3:17 am

I get 503 errors going on subscribed threads sometimes, but stops once i load the page twice. It's not slow at all for me, at least recently.

Targus - May 15, 2018, 10:50 pm

The site has been very slow for me for the past 2 days. Very frequent 503 page errors and a high page loading time. I'm using Google DNS, and my internet plan is quite fast so I am not sure what the problem is here.

Omniscient - May 15, 2018, 11:03 pm

Google DNS has been sucking lately. Try Cloudflare DNS "1.1.1.1"
