Thread: [Alex\[1689778\] Giving out links to ponzi schemes as money making methods.](#)

randomUsername25214 - May 12, 2018, 5:47 am

Sorry for any bad grammar i wrote all of this on my phone.

I know it was posted a couple of days ago but i still see the thread being bumped so i decided to post this in the case he later tries to exit scam.

I saw a thread posted by the user talking about a method to earn bitcoins:

<https://hackforums.net/showthread.php?tid=5833862>

Image incase he removes the thread: Spoiler [\(Click to View\)](#)

PM i later recived: Spoiler [\(Click to View\)](#)

As the pm clearly shows he tells me to go to a website that "mines" bitcoins. It is clearly a classic crypto ponzi scheme. If you do not know what a ponzi scheme is you can simply type it into google/youtube/duckduckgo. I would not be suprised if he is the person running the website. But i can not say that for sure. For anybody who wants to check what the website is i will leave a link here whitout his referral code:

Warning do not put ANY money in to the site: Spoiler [\(Click to View\)](#)<https://multiminig.website/>
