Thread: [Mobile hotspots?](#)

Mac Mill?r - May 12, 2018, 8:20 pm

I was thinking about how many of you use a mobile hotspot for internet, i was kinda in the market for one but want to base my decision with different opinions. Also please name the plan and carrier if you don't mind.

Thanks,
Mac

I use my mobile hotspot often for short periods of time for school work only.. but it's every once in awhile. I like it because it's fast but over time ur data will slow a little bit. I use Verizon and have unlimited data / texting / calling

FamousHater - May 12, 2018, 9:01 pm

you use xfinity hotspot with a hacked account.

I never use a mobile hotspot, idk why

zycamzip - May 12, 2018, 9:33 pm

I sometimes tether using EasyTether, my phone. I use Straighttalk verizon, so also get unlimited everything. But just browsing the web, will nab 300mb an hour. Since they guarantee 22gb at 4g, there is the potential to be rate limited after about a week of tethering.

Cost for mine is \$55 a month.

You will need a straight talk plan, with a verizon phone. Check ebay for that.

I got TMobile unlimited LTE with 10gig of free hotspot tethering.

But my iPhone is jailbroken so I actually have unlimited tethering :D

Haven't paid for home internet in yearssss.....
