i dont want to sale trash either and maybe youve changed the method,
but:

i remember theocritus reviewed your service,
this guy replied to it saying that he saw it being sold for \$5,
he said it involves X,Y,Z theocritus then admitted that its kind of it but with some other changes,
and then mr winnie the pooh started giving the method away for free

not sure if its the same
but i guess if poor ppl need the method they'll just ask winnie the pooh
if they dont like it theyll try urs

if its different from him, and does work, wat r u worrying about? all's good.
if it is the same method as his, and he gives it away for free while you charge for it.. then wow wow shady shady

stop crying u got busted for selling a public method

they both use a vcc and many forums have already leaked the method so pronouncer is doing his duty to serve and save the community from a method that can be found easily on the web

Yes. You can't go around sales threads and state something like that without backing it without any proof. Asking questions is fine but harassing a seller without proof, while having his own definition of what the method is and continuously being pain in the ass is not.

Thanks for reporting.
