Review for [Shlazam](#)'s Free BTC Method

Method Quality and Originality: The method that was posed by the user Shlazam in the Free Services and Giveaways section is a very known method on BTC mining with a Google Chrome Add-on called Crypto Tab. Unfortunately, for this method to be beneficial you will need to get as many referrals as possible because you will be making a percentage of all BTC mined by your referrals, which is actually against the rules for this sub-forum. If you were to just mine BTC with this Google Chrome extension all day you will be using more money in power than making in mining. For instance, I have been using this method I would say almost a month now and I have 37 referrals and I have only acquired \$1.3 (almost). I would also advice staying away from this method if you care about your computers CPU because there is a good chance this can damage it, as the OP advises that it will not. Overall I would only suggest this method if you have a good bit of traffic that will mine BTC for you all day everyday, there would be decent money in this method in that scenario.
