Thread: [\[API\] - \[NEW\] SCANMYBIN.NET | Scantime Web Based Scanner | Fastest engine](#)

Meedman - May 15, 2018, 1:04 pm

We have cut the duration of a scan in half so scanning is now twice as fast!

What is this?

ScanMyBin([ScanMyBin](#)) is a online scan service that provide scantime result (NO FILE DISTRIBUTION), using differents anti-virus programs to diagnose files, archives and more.

How do I use it?

Using ScanMyBin is pretty straight forward, submit a new file and follow the instructions.
For the moment ScanMyBin is free for testing our engine

We support:ArcaVir Antivirus

Ad-Aware Antivirus

Avast Antivirus

AVG Antivirus

Avira Internet Security

BitDefender Total Security

BullGuard Internet Security

Scapula™ - May 19, 2018, 1:44 pm

New hot feature implemented !

You can now send your scan result to your friends with IMAGES !

Preview:

Meedman - May 21, 2018, 7:55 am

API are now available !

For the moment the API is in early acces that's mean it's in BETA.

So the price will be lower than the final one.

What you can do with the API: Get all versions of current AV

Create a new scan (Need API key & it's blocked for unique IP (IP ins't stored clearly))

Get the status of the scan

Get all informations about the scan (Filename, detections, etc..)

All results are only in JSON format for the moment we are working on a .NET library and a PHP class for people who can't understand how API work

For the moment our API don't have any type of documentations,
I'll give all links to know and how it's exactly work
But it's partially same as VirusCheckMate

How to get the API: You need to be a dev or a crypter owner with a scanner

Message me by PM to know more about the price

Kind Regards,
Meedman

I think this scanner is fake.

I have scanned multiple different stubs and I keep getting the exact number of detections for all of them.

13/20

I also downloaded some stubs off the internet and scanned them! Alas. I got the same number of detections 13/20

I have so far scanned over 25 bins from different sources and the results are the same.

Hey mate.

I hope is not a problem by posting here, but I pm'ed you twice and waiting for over 6 hours.

Probably you are busy, but is taking you literally one minute.

Can you please activate the new serial I sent you in private?

Thank you in advance and I hope to hear from you soon.

Hi I'll activate your token in a minute, but the reason why you waited 6 hours is because I'm currently in vacation in a other country

Kind Regards,

Héhéhé :)

Isn't VirusTotal like since we don't share the sample to AV company
But thanks for your message !

Kind Regards,

Meedman, I bought your service. Your scanner doesn't work at all. Old Rat from half year ago on the other scanner shows 26 detections, but on yours always FUD. I scanned different files comparing other scanner and yours. and I tried different time, the first day ordered your service, and after a few days tried to scan again. your scanner never showed the correct scan time result

If you can pm me with your IM contact, I can send the file to you to check and compare.

something must be wrong on your scan engine.

Not only me, I learnt your service from a friend, he was using your scanner.
Now he also has the same issue like I just mentioned with your scanner, 100% detected file shows FUD on your side.

Could you pm me your IM contact? or you want me to upload the file to sendspace with password and pm you the info.

I also want to ask you a few questions about using your api.

Thanks for fast response

Nice website, work perfectly.

Nice service!

Cyber Coder - October 23, 2018, 9:49 am

here is an idea, since you don't want to give at least 2 parallel scans at the same time, maybe add the option to select individual av's to scan, i'm getting pretty tired of waiting 5 mins for some lagged antivirus to finish before i can scan again, makes me spend 3 more time refuting my crypter.

Hello,

It's depend what package you buy the Professional at \$39 per month have 2 parallel scans
But your idea about select antivirus will be done for the next big update

Hello customers,

I just updated the back-end server with a new configuration and optimized everything, this should allow a better analysis time

I hope it stays that way, we'll see it in the future!

You can now renew your token [here](#) !
