This is a website I've been using for a while to get PayPal to buy vBucks for Fortnite. It's really easy, you get surveys pretty much everyday depending on where you are, and it's all deposited via PayPal.

Each survey can take anywhere from 2-90 Min, most are around ~10 and yield \$2. So I check it once in a while to get some surveys done, I have this Chrome Extension that refreshes the page in order to tell me if there is a new survey. Really useful.

The website is called Prolific, and it mainly hosts surveys from Universities and Colleges, so you must use some real info sprinkled in your profile.
