As others have said, colors blend together smoothly, very easy on the eyes.

That's beautiful, man. I love the subtle curvature on the house, draws a great contrast to the bold geometry of the rest of the landscape. Very nice color blending and tasteful use of glow on the window. I'd only complain about the reflections looking a little wonky, but that's just me.

ItsMe0111 - June 30, 2018, 12:20 pm

That's so sick, good job on this!!

Man it is awesome! I made it my wallpaper^^ You must have a great ps skills, people are usually use ai to make such designs

Guap - November 19, 2018, 12:48 pm

I really enjoy your color scheme, very pleasant on the eyes and blends extremely well.

The only thing I'd add is a few more trees to make it seem less isolated, but maybe isolated/comfy is what you were going for.

Great work my man
