Thread: [Hello, Mr. Omniscient.](#)

Lukas - May 15, 2018, 8:36 pm

Hope all of you are having a splendid night. I've been meaning to make this thread for a while, but I keep getting sidetracked. Given I just encountered my problem that inspired this suggestion once again, I've decided to take the initiative to develop this request before the people and our overseer, Omniscient.

So, I take photographs, particularly high resolution photographs with my Canon SL2 and at times, I need to put them on Hack Forums for one reason or the other. I haven't found any sites that don't have an extremely low size cap, for instance, Imgur, other than ImgBB. However, ImgBB is blocked for whatever reason. I'm not sure if there was an incident in the past that resulted in this, but please unblock <http://imgbb.com> so I can use their site for image hosting, that way my photos do not get compressed and lose quality.

Thank you.

Charger - May 15, 2018, 8:38 pm

I'm pretty sure Imgbb got flagged for hosting malware by several anti viruses.

Hydra - May 15, 2018, 9:01 pm

<https://cubeupload.com/>
<https://lensdump.com/>
<https://kuuv.io/>

All with zero compression.

Lukas - May 15, 2018, 10:06 pm

(May 15, 2018 09:01 PM)iHydra Wrote: [\[CITE\]](#) <https://cubeupload.com/>
<https://lensdump.com/>
<https://kuuv.io/>

All with zero compression.

If any of those have direct image embedding (which I'd hope they do), this thread can be closed and request nulled.

Armada - May 15, 2018, 10:13 pm

Why dont you stop griping and make our own image host then?

Its not exactly hard to script that shit.... I see bitching, and complaining... lol

Shit, he doesn't even need a script on his own website, just upload them on the site and rename them.

Omniscient - May 15, 2018, 10:30 pm

Are you sure imgbb.com is blocked? I don't see it in the censor. Sites loading very slowly for me. And be sure to use https as well.

Narrate - May 15, 2018, 10:37 pm

I'm pretty sure that xomf.com also has zero compression.

Lukas - May 15, 2018, 10:38 pm

Check to see if there's anything for "ibb.co" or "image.ibb.co" etc. Whenever I paste a link with the ibb.co URL, it replaced that portion with a #.

Omniscient - May 15, 2018, 10:40 pm

Ahh, I see "i b b. c o" is censored. Is that the image server locations?

Lukas - May 15, 2018, 10:42 pm

Motusora - May 15, 2018, 10:43 pm

imgur does not compress your image if you just login .
try making an account there .

i tried it

Lukas - May 15, 2018, 10:47 pm

I've been using Imgur for years, with an account -- it does.

Still better to use another less saturated site though.

Omniscient - May 15, 2018, 11:08 pm

Looks like the URL is coming up clean now. I believe it was coming up as malicious in the past that's why it was censored.

Meow - May 16, 2018, 2:24 am

Thanks for unblocking it, much better than imgur

Dust. - May 16, 2018, 2:32 am

What are the risk factors to HF users if img.ibt.com still hosts malwares on their website and some user just posts those malicious links in various HF threads? (Of course this can apply to any website, but img.bb has a terrible history)

Sir-Teabag - May 16, 2018, 4:30 am

Okay what I would recommend, is that you purchase a domain and host at Hostinger.

>Go to file manager

>drag and drop your images (or use the FTP)

>then link the image here

For example, I can do this with any image I want. No limits. Code

[img]https://net-paste.com/apple.png [/img]

If you want some help setting that shoot me a PM.

Lukas - May 16, 2018, 7:12 am

Thanks.

I already own a domain and hosting, however I would prefer to use a site as such. :)
