Thread: [Time limit - Messaging](#)

Mr Professor - May 18, 2018, 11:24 pm

Apparently, I have to wait for 300 seconds after sending one private message.

But, that's a long time, considering I'm getting ALOT of messages and I need to reply to all of them.

Can I bypass this restriction if I get e3pic or l33t upgrade?

The Avengers - May 19, 2018, 12:40 am

I believe if you upgrade to l33t the time is drastically reduced when sending PM's, although it is not listed on the upgrades page I am 90% sure that upgrading does.

This might help you with your question.

3p1c

Private Message flood limit set to 1 second (*additionally requires Ub3r)

You will also need to be approved for Ub3r

Omniscient - May 19, 2018, 1:16 pm

If you're L33t it's a much lower PM limit.
