Thread: [My 2FA Code isn't Working](#)

CKkio23__Temp - May 19, 2018, 10:41 pm

i made a backup of the code for my original account CKkio23. But the code isnt valid. i kept trying dont want to get the account locked.

i sent an email a week ago with no response. Please Remove this Thank You.

Xerotic - May 19, 2018, 10:43 pm

Please use the following page to recover your lost account: <https://hackforums.net/recovery.php>

Once you submit that form then Factor8 will get in contact with you.

ntoskrnl.exe - May 20, 2018, 1:56 am

This is why you don't wanna use 2FA.

VirtualFrost - May 20, 2018, 4:33 am

If you can't be bothered about writing down a backup code for 2FA I'm worried about what your passwords are like

Learn to read OP's post bro.

(May 19, 2018 10:41 PM)CKkio23__Temp Wrote: [\[CITE\]](#) i made a backup of the code for my original account CKkio23. But the code isnt valid.

Also, I keep all my passwords encrypted in password manager, no password reusing (and I was never hacked).

I don't see any point of using 2FA as it doesn't protect you from anything, it just complicates your life and many people lost their account because of that overhyped shitty feature.

Cammy - May 20, 2018, 6:08 am

Idk what you're doing but it takes maybe 10 seconds to use 2fa. You just sound too lazy or dumb to use it tbh.

ntoskrnl.exe - May 20, 2018, 6:49 am

Why would I even use it, I know how to generate a good random password bro.

Hack me if you can and I will give you \$100.

Dumb? ?

Just take a look on how many people got locked out of their accounts because of 2FA, search is your friend.

Dumb? ?

Just take a look on how many people got locked out of their accounts because of 2FA, search is your friend.

You should also take a look at why the vast majority of them were locked out

It's not 2FA's fault people don't know how to properly use it ?

Omniscient - May 20, 2018, 1:08 pm

If you have your 2FA and your account isn't working then it's 99% your device time.

OP looks like he changed his 2FA at one point so I can't be sure if his backup code is his current 2FA secret or the past one. He may not have updated his backup code. He has to PM me or use the contact form and I confirm which one it is.

@ntoskrnl.exe - Banned and if you come back and don't 2FA I'm closing your account. I won't tolerate you telling members to not use a very important security feature. For those who have 2FA trouble, it's on their end and the system works extremely well. It's user error when it doesn't work.

VirtualFrost - May 20, 2018, 3:04 pm

It isn't a thing when application is secured properly, and that is not my problem.

If my account gets exposed, every account gets exposed.

And good luck bruteforcing my pass whoever gets DB. ?

EDIT: Got -10 for telling the truth.

You got a -10 for being an idiot and talking out of your ass. With your stupid logic then hacking accounts should be impossible. If you can't see any of the benefit 2FA has given the forum then you are blind. I seriously hope you get closed for continuing to wine about it and telling people not to use an important feature you're too hopeless to use. Maybe the temp ban wasn't enough

EDIT: Got -10 for telling the truth.

You have great password security. Combined with 2FA it'd be great. If you get 'exposed', then only you really get exposed, as most other members will be using 2FA.

I do take your point though, if you have a strong password and the database is leaked, then you're probably fine, nobody will be able to crack your hash.

Still, 2FA is a cool feature when used correctly.

"Gauth/2FA: Not Activated"

Omni said he will close you if you don't activate it, do you really want to test him? ?

ntoskrnl.exe - May 28, 2018, 10:36 am

Why should I care?

I am here since 2011, before 2FA was even introduced, if he wants to close me he will close me.

And AFAIK 2FA is not mandatory by any rule. ?

Elitas - May 28, 2018, 10:46 am

I wouldn't like to see you closed, but you were discouraging the use of a security feature. It is Omni's site so rules won't stop him from closing you, and that is an important security feature so you should use it either way. I agree that you shouldn't be forced to use it, but IDK Omni is in savage-mode so get outta the way. ?

ntoskrnl.exe - May 28, 2018, 10:48 am

I am not forcing anyone not to use it.
Everyone should have its own opinion and right to express it.

Imao

u fool

no not "every" account gets exposed. as even if i have omni's email and password it is no use to me if he has gauth enabled i will still be locked out. its why many many sites offer it to its customers these days like coinbase,comcast,youtube etc

as this site used to be targeted all the time using sentry mba to crack accounts and use to be very possible to do with no gauth feature so its a great thing to do and as omni has stated before members should not be allowed to use the marketplace without gauth enabled.

And what are the odds hacker will target me from the whole database?

If DB hack gets public Omni will force password resets.

DB hacks happened before and had zero impact on overall security.
