Thread: [Anyone else feel like hf is lagging from time to time?](#)

Elmo. - May 22, 2018, 3:51 am

I usually browse hf like 10 times a day and like 3 times a day hf's just frozen and not switching pages feels like ddos. What's up with that?

SIM-3391627 - May 22, 2018, 4:06 am

I feel you, it happens to me sometimes. Tbh, I'm not sure.. when I slow down it's fine.

Skull-13 - May 22, 2018, 5:08 am

Well, for me everything is OK. I do not have any issues on site.

Knife? - May 22, 2018, 5:10 am

It has been happening to me lately too. Maybe in the past month or two it's been doing this.

I believe Omniscient had plans to move the servers. I am not even sure if this has happened yet. Hope to see changes soon.

Genoboy - May 22, 2018, 5:26 am

HF's working fine for me. No slowdowns, etc.

SIM-964740 - May 22, 2018, 5:45 am

Sometimes, but sometimes I am unsure if it is because of my own internet.

marketersradio - May 22, 2018, 5:51 am

HF working fine on this end

10 times a day

3 times a day

i feel for you

I randomly get 503 errors from HackForums alone. Some days it's completely fine and others I can't even load a single page for up to a day. It's pretty rare but quite annoying though.

Gosh, that sounds horrible, sure it's not you rather than HF?

503 is a server side error plus I can load every other website fine. Not really sure why it happens.

Scriph - May 22, 2018, 6:19 am

Omni should really have multiple servers for such a popular site...

TB12 - May 22, 2018, 6:36 am

Its been ok for me, hopefully my luck continues lol

Yeah same thing, a couple months since this started.

If you mean this:

This is normal, it's been around for so long. It's some type of "anti-bot?" thingy that prevent's your from overflowing the site from loading millions of pages at the same time from the same address, try it yourself. Quickly open 20 tabs of hf and like 3 of them goes to hf and the rest to 503. It resets within 10 seconds though that it won't appear anymore.

Yeah, happens when I try opening about 8+ tabs (going on big posting sprees, ive change dmy methods now though).

I love hf so it's all cool if they lag but it's mainly my own internet

Neodraxis - May 22, 2018, 5:49 pm

Hm, might just be on your end. I haven't been having any issues yet.

I can't quite remember how many tabs I had open when it occurred but maybe that was the problem since I have only had one or two open recently and it's been fine. Thanks for the response though.

negativezulu - May 22, 2018, 7:13 pm

i noticed this sometimes. I noticed this couple days ago.

C a k e - May 22, 2018, 7:16 pm

I'm so used to that happening with forums cause of DDOS and shiz

Don't think this is caused by DDOS though. Thinkits just server issues.

itsMeCherry - May 23, 2018, 12:47 am

actually recently ive had this happen to me too

Blazin - May 23, 2018, 12:49 am

What's up with your internet and router and home network bro? This shit loads blazin fast and snappy quick. and I don't even have 10 mBPS right now. I feel like I'm on the lightning network of HF.

Marketplace - May 23, 2018, 6:30 am

Not really. But I must say I'm fairly new on HF so yeah
