Hello!

I've recently stumbled upon a pretty massive database, i ran it against twitter with sentryMBA and got 150,000 hits in total.

This can be used to mass advertise/mass manipulate twitter / launch twitter service like tweet spam / follower service, all these accounts are 100% real, they're cracked, aged, email verified.

Price

1,000 Accounts = \$25

PM Me! :)
