Thread: [Scammed by TheHook for \\$205](#)

flowsizer - May 22, 2018, 11:40 pm

The hook has botnet setups in a thread that is highlighted in the botnet forum under hooksetups.

I chose to use a dedicated server, setup, mentoring, crypt, and 100 bots to test. He delivered a server with a username and nothing else. I have no administrative powers, no crypt, no bots, and no mentoring. He has ghosted me after showing me the server with no stats. I have attempted to contact for the past 5 days over jabber when he has been online. I have logged our deal conversation and have proof of payment. I cannot post links because I do not have 50 posts overall. If asked for proof I will provide within 12 hours.

Do not deal with this scammer.

just paste the links broken up with spaces and stuff like that

Also make sure you include his UID
