Thread: [HackForums Artist Appreciation & Discovery](#)

How many artists do we have here on HF? Producers? Engineers? Mangers? People within the Music/Entertainment Industries in general?

I'm an artist myself and also work as a CD/Aspiring A&R within the industry. I remember years ago the rap/hip-hop section was pretty heavy with text and audio battles. Every once in awhile someone posts a song they've sang/rapped or produced... So I figured why not make a thread to highlight all of Hackforums artists?

Check out my trap beat thread :)

Been producing for a couple of years on and off. Never owned any studio equipment except for a Midi/keyboard, but maybe I should in order to advance lol.

@mael I really liked the one in the first link something I haven't really listened to that much, a flow of calm beats and diverse rapping style. It is really great man keep up the good work.
