What is a large project?

There isn't a line on the difference between the projects. Depending on how hard it would be for me to make. Logos and thread designs are definitely large projects. Small projects are avatars and sigs.

Old works:

Wip. Sorry. Last time I designed on hf was a few months ago, I set the time in-between now and then to improving on my skills. A lot of stuff went missing.

How can you call yourself service "best at animation on HF" when you don't have any past work to prove that statement?
