Thread: [My coding journey](#)

Vanderbilt - May 25, 2018, 2:33 am

Got codeacademy pro. Haven't used it. Just need motivation so ill make this thread. Idc if you dont read it but ill update it whenever. usually daily/weekly

Im making about 80-90k before taxes a year with social media marketing agency so I guess before I get out of highschool, I should learn a good amount of coding during the summer ;) I'm now a senior

Start: May 25, 2018

HTML

Ill prob continue marketing but coding also helps. I worked for bojangles (Fast food) and hated it so I really dont want to work for anyone. Still, as a senior in highschool, I am making 80-90k before taxes. No, I dont have a fancy car (07 dodge charger), yes I have yeezys. I like saving but I think it should help me.

You want to be a Web-Developer? Social Media Marketing + Web-Developer = Good Choice.

My first programming language was C. You should try that out sometimes its also fun to be honest. HTML is not really a programming language its a markup language aka displaying , organizing web content and structures instead of processing information and algorithms.

Good Luck on your journey. After you have learned HTML , try CSS + javascript. If you want to hone your skills as a web dev.

Nice achievement so far. Better than I have ever had (my is like 12k euros after taxes, but I live in pretty much poor country lol).

Anyways, may I ask, why do you want to learn programming? You are doing one hell of a good job

already, why dont you invest even more in your current profession? (then you can probably double that money)

Still in highschool bud. I want to do it becasue its always been something I have wanted to dabble in. I'll probably major in Marketing and have a mionor that im trying to decide.

Choices listed by interest

Business Administration

Offensive/Defensive IT security

Web Design/ other coding

It would just be nice to learn I guess.

Also shoutout to the salty ass who 1 starred me ? ?

Aham, nice choices btw ?

I like the second one, something I might try in the future.

Good luck with either of those ? ?
