Thread: [ASAP Rocky- Testing](#)

Yo listeners, I hope do you listen to Rocky, if you don't, please don't comment on that thread, and if you comment be constructive ? .

I waited for this album from last year, I know it will be a big boom in the "rap" industry.

I've listened to some tracks and it seems that music is experimental, there we go..the name of the album "TESTING".

What's your opinion about that album? I will appreciate all comments because Rocky is my favorite in foreign music.

P.S: I'm stoned and drunk at the same time and I probably contradicted myself above.

I'm just beginning to listen to the album. So far I'm a 1/3 through it and I'm loving every track. I got some decent audio equipment so alotta things sound good but this is wild so far. Rocky always has some good mellow dope tracks that I really mess with heavily so I've been waiting for him to put out something new. I was also really looking forward to see who he collaborated with on this album. I don't have much to say as of now other than the beginning of the album is sounding pretty good.
