Thread: [State of Decay 2 - Duplication Glitch \(Any Inventory Item\)](#)

RollinThatDice - May 25, 2018, 1:44 pm

IMPORTANT!: Failure to follow each step carefully will result in loss of save game data. This will wipe all your progress.

Xbox One only!

1. Save your campaign by switching characters or turning your game to public or solo.
2. Join a friends game and load up your inventory with everything you want to dupe.
3. Drop your inventory on the floor and LEAVE THE INVENTORY SCREEN OPEN.
4. Open the xbox guide, navigate to State of Decay 2, press start and select Manage.
5. Delete your save game and when asked select CONSOLE ONLY.
6. Rejoin your friends game and your items will be in storage as well as on the floor.

Anything that can be placed into your inventory can be duplicated. That means rucksacks too, unfortunately only one at a time though.

I'm not really sure. I can test on Monday. Either way I the whole process only takes 1 or 2 minutes longer than if you were to just quit the application.

You don't lose anything doing this glitch. Saved data is stored in the cloud that's why this glitch works. It loads your last cloud save from when you switch characters or switch to or from multiplayer.

Why don't you just post the video you took this from? Would've been easier and neater.

If you have a PC you can use take advantage of the play anywhere feature, there's a trainer you can use, just use it offline on your game and get whatever you want. Go back on XB1 and it'll sync

The only one I've seen you needed to be a premium member. Guess I didn't look enough.
