Hyperhacktive - May 26, 2018, 4:18 pm

[\$7]Instead of \$10 = Currently at -30% Off for a limited time with coupon : HF30off Get yours Now !

Direct buy : <https://selly.gg/p/3eae0a3d>

Av scantime results :

Av runtime results (unencrypted downloader & xmrig downloaded as a file, no delay before execution :

Payment methods : Bitcoin, Ethereum, BitcoinCash, Zcash, Dash, Digibyte

[\$7]Instead of \$10 =Currently at -30% Off for a limited time with coupon : HF30off Get yours Now !

Vouch copies available for upgraded members : 0/3

Vouches : (May 27, 2018 11:53 PM)Karate Kid Wrote: [\[CITE\]](#) I received a vouch copy from OP, here's my honest review of the product.

[Functionality 10/10]

The file size is only 6kb, which is really small. And it's a simple downloader, not much to explain, it works perfectly

[Ease of usage 10/10]

This is super easy to use and simple GUI, any 7 years old can use it

[Detection 9/10]

Viruscheckmate is down i cant check it, but according to OP's scan, it is scantime FUD. When i try to run it, my chinese version 360 av picked it up immediately, and i tried it again on VMs running bitdefender and mcafee, its undetected. It is the best result you can ask for when it is not even crypted.

[Support 10/10]

Even when I'm a non-paying user, OP is really nice and humble.

I definitely recommend this downloader, and the price is reasonable.

FAQ :

Why would I use HyperDownloader ? Quote:Imagine you have an executable to send to a person but you don't want it to be shared (with other people, online antivirus scanning engines, or other reasons).

Instead of sending it directly, you will upload it on a file sharing website and paste the direct link in Hyper and generate a small exe to give to the person. If the person upload it somewhere it will only be the output from Hyper and not your real file.

And when the person starts the generated exe it will download your real file in the background and execute it.

So in fact Hyper acts like a "proxy executable" to your file

What is the final size of the downloader once I create it ? Quote:It depends on your icon size, but

without an icon the output is small : 8Kb

Any question ? [PM me](#)

altosc - May 26, 2018, 9:29 pm

This looks like a promising little product, and I would be interested in a vouch copy.

000 - May 27, 2018, 2:44 am

Wouldn't antivirus detect the file when the payload is downloaded into "Temp" folder?

Here's a better approach to download-and-execute:

<https://hackforums.net/showthread.php?tid=5767202&pid=56378615#pid56378615>

Note: This works only for .Net applications but you can add option for user to select Native or .Net Applications.

Hyperhacktive - May 27, 2018, 4:07 am

If your payload is undetected it shouldn't be a problem, whatever folder you choose on the list.

Anyways you're right that .Net apps could be injected, i'll look at it soon. Thanks for the link ?

(May 27, 2018 02:44 AM)Avalerion Wrote: [\[CITE\]](#) Wouldn't antivirus detect the file when the payload is downloaded into "Temp" folder?

-snip-

After your post I've added a runtime scan to the thread with no delay applied (the downloader wasn't crypted and downloaded xmrig).

I'll still look at .Net app injection ?

Lextian - May 28, 2018, 8:57 pm

Posting here to find this later as this might come handy when i need it.

SIM-3326956 - May 30, 2018, 3:18 pm

Vouch for Hyperhacktive i tested out the builder with # and everything worked as said the builder is simple and easy to use the stub size is really small and i didn't run into any problems at all while using it overall it works really well and I would recommend getting it for the price it's at right now.

here are my scan results for when i tested it out.

You shouldn't advertise it as FUD but UD.

Hyperhacktive - June 16, 2018, 7:29 pm

(Jun 16, 2018 07:03 PM)Juffar Wrote: [\[CITE\]](#) You shouldn't advertise it as FUD but UD.

You're right that it isn't Fud scantime & runtime.

However it is scantime fud as advertised in the thread :

<https://antiscan.me/scan/result?id=bc0606f73ae4b1e714ce79b2cffee117>

I'll update the thread with the upcoming release to make it clear ?

And btw thanks for your interest

Mac_Tonight - June 19, 2018, 2:04 pm

Don't pass up on this product

A great tool for anyone looking to spread

Mac_Tonight - June 24, 2018, 5:46 am

Bump for this tool can't wait for the update on this

Justanotheralias - June 25, 2018, 1:59 pm

(Jun 24, 2018 05:46 AM)Mac_Tonight Wrote: [\[CITE\]](#) Bump for this tool can't wait for the update on this

Bumps aren't allowed.

However, it does look like a nice tool :p

Mac_Tonight - June 29, 2018, 3:13 pm

This is a great tool I have been using it for a while

Kabir - June 30, 2018, 6:26 am

i dont know will this give me WD detections just askin

MonsterPrograms - July 2, 2018, 10:41 am

Might use this in the future

Thank you for your comments, it is highly appreciated

(Jun 30, 2018 06:26 AM)Robinnh Wrote: [\[CITE\]](#) i dont know will this give me WD detections just askin

HyperDownloader isn't detected by Windows Defender as for now ?

(Jul 2, 2018 10:41 AM)MonsterPrograms Wrote: [\[CITE\]](#) Might use this in the future

Thank you, feel free to ask if you have any question

The update is ready, each buyer is free to ask for his copy by sending a pm with his order ID.
The update includes UAC bypass methods for Windows 7 up to Windows 10 ,a file binder and a free icon pack.

Gordan Zadro - July 4, 2018, 8:48 am

Does this works perfectly with Netwire and can you let me know how to contact you best.

Mac_Tonight - July 4, 2018, 8:53 am

That's right, thank you

travisci - August 4, 2018, 9:40 am

Can someone confirm this to be FUD runtime for Windows Defender?

Hyperhactive - August 5, 2018, 10:13 am

(Aug 4, 2018 09:40 AM)travisci Wrote: [\[CITE\]](#) Can someone confirm this to be FUD runtime for Windows Defender?

Last time I checked the downloader was undetected by Windows Defender at scantime and runtime.

Z0MBys - November 11, 2018, 8:41 am

Looking good, might buy :)

avalanche - November 24, 2018, 1:18 pm

plis can I use another crypter to cypt this after building ??
