Thread: [VINYL Wrap template \(Mobile Phones & consoles\)](#)

iamvexatious - May 26, 2018, 11:36 pm

Hey HF,

Recently got my hands on a sticker cutting machine & wanna make some skins for my devices, I've got a few rolls of Vinyl with carbon, Matte & Marble, Looking at getting some other materials too.

Have found a few sites offering EPS files for this but they're \$60 US + and not reallyyy pricerange for a hobby.

If anyone can help it would be super appreciated, May be able to swing some stickers your way too.

(Example of what I need
