[Whoami VPN](#) - Open BETA Access

Signup: <https://www.whoamivpn.com/signup>

Download: <https://www.whoamivpn.com/downloads>

Twitter: <https://twitter.com/WhoamiVPN>

Facebook: <https://www.facebook.com/whoamipanama>

Reddit: <https://www.reddit.com/r/whoamivpn>

Privacy Policy: <https://www.whoamivpn.com/privacy>

We've been working on a VPN project and are currently within the stage of releasing the beta for testing and would like to extend an invitation to all HF members here who'd like to be interested in trying out WhoamiVPN and giving us feedback on the product. Please note that this is currently within beta, so can expect problems and bugs, but that's why I'm looking to have folks here help us beta test our VPN, so we can correct any bugs or issues for our final release, which will be shortly.

I'd like to add that you'll have the ability test with absolutely no data limits during the beta period so you can use as much as you like, however we'll have limited servers and several countries. Right now we're just trying to find any bugs that might be within the VPN, and that's where you folks come in, as we need as much feedback as possible.

Also we'll be having a FREE version within our final release. There will be no restrictions on data, but it will only be limited number of servers which will be announced within the final release.

VPN Client

Many new features have been developed to ensure the privacy of our users. As we progress with development we look forward to working with you fix add more features, fix any bugs you may find or provide your feedback and experience using our client.

Whoami VPN client includes:

- Bypass restrictive firewall rules with Stunnel
- Bypass mobile data limits and firewalled internet access
- Utilizing of the most secure encryption algorithms for key exchange ECDSA384 / SHA384. This algorithm is also used in Bitcoin and Ethereum which make it highly reputable.
- Adblocker, block advertisement networks without the need to install any sketchy 3rd party plugins for your browser.
- Malware blocker, block unwanted IP addresses/domain names that have proven to be malicious.
- Beacon animation improved.
- Improved quality of the UI components.
- Fixed random disconnects.

- Implemented encryption of all DNS traffic, prevent spying, spoofing and MITM attacks (man-in-the-middle attack)
- DNS logs are removed frequently. No data are collected or distributed from the DNS server.
- Increased the DNS lookup speed.
- Fixed soft reset issue, disconnected after 1 hour.
- Implemented handling for drops, sleeps and other connection issues.
- Switched from AES-128 to AES-256-GCM

Our VPN client does support Microsoft Windows Vista, 7, 8, 10 (requires .net 4.5.2 or later) & Mac OS X versions 10.10 and later.

Once signed into our website, you'll also have the option to download and use our OpenVPN client certificate files within our download page.

Thanks, Whoami VPN Team. ?

Pronouncer - May 27, 2018, 10:41 pm

Just gonna have to steal the first.post, this looks daym sexy

Noisy - May 28, 2018, 12:42 am

Looks really nice, Will try and beta test it soon!

#Skyline - May 28, 2018, 1:31 am

(May 27, 2018 10:41 PM)Pronouncer Wrote: [\[CITE\]](#) Just gonna have to steal the first.post, this looks daym sexy
I know you love us ?

(May 28, 2018 12:42 AM)Noisy Wrote: [\[CITE\]](#) Looks really nice, Will try and beta test it soon!
Thank you, and feel free to provide your feedback.

Our OSX client is currently under development and we will annouce once it has been released for beta testing. We will be adding the same features from our new Windows client into the new OSX client.

#Skyline - May 29, 2018, 11:10 pm

Feel free to use our service while we're still in beta development.
New features coming soon. We are still focused on finishing the new OS X client.

For inquires contact me via PM, post on this thread or create a support ticket on our website.

I-I-I - May 30, 2018, 4:37 am

The website looks damn attractive.

Will this VPN be free later or will be a paid one ?

#Skyline - May 30, 2018, 5:25 am

(May 30, 2018 04:37 AM)I-I I-I Wrote: [\[CITE\]](#) The website looks damn attractive.
Will this VPN be free later or will be a paid one ?
Thanks, glad you like our UI.

And yes, we'll be having a FREE version within our final release. There will be no restrictions on data, but it will only be limited number of servers which will be announced within the final release.

userone - May 30, 2018, 8:26 am

The look is so attractive.

I will absolutely try this one.

#Skyline - May 30, 2018, 10:59 pm

(May 30, 2018 08:26 AM)userone Wrote: [\[CITE\]](#) The look is so attractive.

I will absolutely try this one.
Thank you.

Our new OS X client will be released very soon. We will update the thread with a download link to the new client once it has been released.

Juffar - May 31, 2018, 3:59 pm

UI (and the features) looks great. I wish you all the luck with this project!

Marwiz - June 1, 2018, 3:52 am

UI is looking great, I will love to try this one.

#Skyline - June 5, 2018, 4:00 am

We have finished adding the new features to our OS X client. In the phase of compiling new build for the client.

Once this has been completed, we will make our new OS X client publicly accessible.

Stay tuned for more updates.

RyuDSwift - June 5, 2018, 6:46 am

This looks and feels good.
Thanx. looking forward to when you guys launch.

I-I I-I - June 6, 2018, 12:27 am

I am still using this and I had got the good experience with this.
Great vouch for this VPN. Looking forward for a complete release.

#Skyline - June 6, 2018, 5:08 pm

Thank you. We've come a long way since day one. Been in beta developemnt for around a year now. The team are really excited to transition into the market.

(Jun 6, 2018 12:27 AM)I-I I-I Wrote: [\[CITE\]](#) I am still using this and I had got the good experience with this.

Great vouch for this VPN. Looking forward for a complete release.
Thanks for being a beta tester !

Also, WhoamiVPN does not log. We choose our VPN locations based on government legalisations regarding data retention laws. We will never host in a country that does this. Our company is registered in a country where privacy is respected by constitutional law. We do not log your data !

devnull - June 10, 2018, 8:07 pm

I quite love the UI. I'll have to try the service out.

-P.S I don't really use my signature space, so I'll go ahead and support it. Most likely will be there for months / year because I'm too lazy changing stuff around ;)

SlowMehMo - June 10, 2018, 8:32 pm

Oooooooooohhh preeettttyyyyy ?

i don't care what it does i'm keeping this bookmarked and coming back to it, probably to buy it but mainly to look at it.

#Skyline - June 10, 2018, 9:16 pm

(Jun 10, 2018 08:07 PM)devnull Wrote: [\[CITE\]](#) I quite love the UI. I'll have to try the service out.

We're currently within the process of transitioning from beta development to our final product.

Our new OS X client will be available anyday now, we're just doing some finalizations before release. PayPal gateway has been implemented and coinpayments integration will soon be implemented. We're slowly getting ready for our premium release. However, we're in no rush, as the final product is important to us and our users.

If anyone has any issues with our service, please create a support ticket within our website.
If anyone would like to leave feedback, bug findings or improvements regarding our VPN, please post on our thread, or contact me.

MarcheseAEY - June 14, 2018, 4:52 am

Hello, thank you for making your product open access and available for testing. I'm testing the VPN as we speak. Very great job, so far so good from my side.

Ganja - June 14, 2018, 12:41 pm

I like the look of it, but there are some errors in your JS on the website:

Spoiler [\(Click to View\)](#)

EDIT: also, my other test account ' ' (yeah, username is 2 spaces) doesn't have a password anymore.

MyIntrepid - June 14, 2018, 12:48 pm

This looks dope, I will be testing this and I hope this doesn't keep logs or anything.

Dafuq™ - June 14, 2018, 1:44 pm

(Jun 14, 2018 12:41 PM)El Pusstolero Wrote: [\[CITE\]](#) I like the look of it, but there are some errors in your JS on the website:

Yes we have plans to add both. Soon as we've transitioned into a premium service we will be looking into Android/iOS mobile app. Along with a Linux client.

Juffar - July 1, 2018, 7:34 am

You should really work on these random disconnects. It's not good at all.

#Skyline - July 2, 2018, 5:34 pm

(Jul 1, 2018 07:34 AM)Juffar Wrote: [\[CITE\]](#) You should really work on these random disconnects. It's not good at all.

We have been looking into it. I have also sent you a PM regarding this.

Hate?? - July 2, 2018, 7:06 pm

I downloaded this on my Mac OS X El Capitan Version 10.11.6

I'll be messaging you with anything weird I come across to help you get this up and running flawlessly!

First thing I did notice is that I can't minimize the client. That would be a good thing to add I guess.

#Skyline - July 2, 2018, 7:20 pm

(Jul 2, 2018 07:06 PM)Hate?? Wrote: [\[CITE\]](#) I downloaded this on my Mac OS X El Capitan Version 10.11.6

Please be aware we have a new OSX client still within development that will correct all current bugs along with new features. We still haven't release the test build either for the OSX, but will announce once this available. So do expect some bugs with the current version you have downloaded.

Hate?? - July 2, 2018, 7:26 pm

Anytime, and thank you.

We are currently migrating our services from Ubuntu to a more stable OS. If you experience any downtime it is because of this.

#Skyline - August 2, 2018, 9:33 pm

Please feel free to beta test our product before release.
If you have any issues or find any bugs please report them to us.

Wolfmilan - August 6, 2018, 2:00 pm

Looks really nice, Will try and beta test it soon!

DawnOfTheDead - August 6, 2018, 10:39 pm

Thanks for being free. I might need it, registered!
I will try it and report bugs if i find one...

xmagepurx - August 7, 2018, 9:43 am

I can't connect. I click the switch and the dot starts moving then disappears and the switch turns off.

#Skyline - August 12, 2018, 10:43 pm

If you have old versions of our VPN installed on your device, please uninstall them and install our latest client.

Ensure that you've installed the TAP adapter within the installation process.

And please note, our newest features will only work with our USA location. You can connect to our Netherlands location, however just don't use any of the new features until we implement them on all locations.

If you still have this issue, please PM and I will look into it with you.

#Skyline - August 21, 2018, 1:57 am

Thought I'd update everyone.

We're currently fixing bugs with our new OSX client before we release this for beta usage.

We've also just finished migrating our servers to a more lightweight and secure environment which will provide better performance results and safety for our users.

#Skyline - August 28, 2018, 9:54 pm

Feel free to use our VPN while we are still within beta development !

Givenchy - August 29, 2018, 6:15 am

Goodluck with your VPN Skyline. It look's very interesting can't wait for the official release!

#Skyline - August 30, 2018, 7:52 pm

(Aug 29, 2018 06:15 AM)Givenchy Wrote: [\[CITE\]](#) Goodluck with your VPN Skyline. It look's very interesting can't wait for the official release!

Thank you. We have a lot more to come before we even get to the official release.

Just stay tuned however. ?

#Skyline - September 1, 2018, 8:01 am

Our new Windows client is now available.

- Improved iodine/stunnel/openvpn/dnscrypt processes management and error checking

Download link: [https://drive\[WARNING POSSIBLY INFECTED\]google.com/open?id=1GqB9EeQwwQwVH08NppLvuELCQccWsl0b](https://drive.google.com/open?id=1GqB9EeQwwQwVH08NppLvuELCQccWsl0b)

Note: Please remove previous Windows client before installing a new one.

Note: Please only test with USA server.

Kappa - September 1, 2018, 8:03 am

Does this vpn have a killswitch? That'd be a nice suggestion for you if not :p

#Skyline - September 1, 2018, 8:07 am

(Sep 1, 2018 08:03 AM)Kappa Wrote: [\[CITE\]](#) Does this vpn have a killswitch? That'd be a nice suggestion for you if not :p

Not yet, however we will be.

#Skyline - September 2, 2018, 8:02 pm

Remember our new Windows client will only work for our USA server.

Also remember to remove old clients from your device before installing a new Whoami VPN client.

We're working on a auto-download feature to fix this.

If you have any questions regarding Whoami VPN beta development please contact me or submit a support ticket on our website and I will get to you ASAP.

Please note, we cannot give an official statement regarding the final release of Whoami VPN, however we ask for you to keep updated with annoucments and new updates until we can make a statemnet regarding the final release.

Thanks in advance!

Yes it is compatible with OpenVPN. Just download our client configuration files, and if you have issues contact me or open a support tickete on our website.

And we will be working on a Linux clinet after once we have officially released our service.

#Skyline - September 5, 2018, 8:38 pm

IT'S FINALLY HERE !

OSX Client is now available.

[https://drive\[WARNING POSSIBLY INFECTED\]google.com/open?id=1pF5B-EBEBofrKYhE1UhTukLia_KCb_v0](https://drive.google.com/open?id=1pF5B-EBEBofrKYhE1UhTukLia_KCb_v0)

- All new features within our Windows client have been transitioned into our OS X client.
- Bypass restrictive firewall rules with Stunnel
- Bypass mobile data limits and firewalled internet access
- Utilizing of the most secure encryption algorithms for key exchange ECDSA384 / SHA384. This algorithm is also used in Bitcoin and Ethereum which make it highly reputable.
- Adblocker, block advertisement networks without the need to install any sketchy 3rd party plugins for your browser.
- Malware blocker, block unwanted IP addresses/domain names that have proven to be malicious.
- Beacon animation improved.
- Improved quality of the UI components.
- Fixed random disconnects.
- Implemented encryption of all DNS traffic, prevent spying, spoofing and MITM attacks (man-in-the-middle attack)
- DNS logs are removed frequently. No data are collected or distributed from the DNS server.
- Increased the DNS lookup speed.
- Fixed soft reset issue, disconnected after 1 hour.
- Implemented handling for drops, sleeps and other connection issues.
- Switched from AES-128 to AES-256-GCM
- limproved connection error checking

IMPORTANT NOTES:

- Perform tests on US server only.
- Remove previous client versions from system before installing new client

SUI-3183372 - September 5, 2018, 8:42 pm

Quote:IMPORTANT NOTES:

- Perform tests on US server only.

Are there any issues on the European server?

#Skyline - September 5, 2018, 8:47 pm

(Sep 5, 2018 08:42 PM)Previously Known As.... Wrote: [\[CITE\]](#) Are there any issues on the European server?

We haven't setup our latest features to work with our Netherlands location at this current time, only USA.

It's on our to do list to get our Netherlands server setup to work with new features.

VisualSoft - September 7, 2018, 9:29 am

Does it supports port forwarding..

#Skyline - September 7, 2018, 6:39 pm

(Sep 7, 2018 09:29 AM)VisualSoft Wrote: [\[CITE\]](#) Does it supports port forwarding..
Not currently.

And when we do support port forwarding, it will be dynamically, meaning we will choose your ports for you.

This is to minimize the risk of skids using malware on our servers.

IMPORTANT TO ALL USERS AT THIS CURRENT TIME

We are experiencing an issue with VPN-over-DNS with our Windows client.

This bug will result in multiple disconnect and connections from the client to server.

It is advised not to use this setting until we have fixed this on our behalf.

#Skyline - September 8, 2018, 5:28 pm

Catching another bug during testing, using ovpn file from tunnelbroker (macos) default setting, neither tcp/udp nl/us are working.

Log has been sent to support.

Any code redeem for l33t?

#Skyline - October 5, 2018, 6:30 am

(Oct 5, 2018 01:10 AM)ayamkampung Wrote: [\[CITE\]](#) Catching another bug during testing, using ovpn file from tunnelbroker (macos) default setting, neither tcp/udp nl/us are working.

Log has been sent to support.

Any code redeem for l33t?

Thank you for reporting and finding the bug.

And what do you mean by code ?

#Skyline - October 11, 2018, 6:26 pm

We have now fixed a authentication issue with our OpenVPN configuration files.

This bug will not occur again, so feel free to use our OpenVPN configuration files or our client to access our VPN.

#Skyline - October 14, 2018, 9:01 pm

Feel free to make use of our VPN while we're still in beta.

Once beta development has finished we will still be providing free access to only one location.

Still alot of work to do before this is complete, we have been in beta development for over a year

now as quality and privacy is our priority before we are ready to become a premium service.

Stay tuned for new updates and features regarding Whoami VPN.

#Skyline - October 15, 2018, 9:39 pm

Recently all Chinese users could access our VPN, however that has changed and China is unable to access our VPN because we think they're blocking us or it's a configuration issue on our side. We are looking into fixing this and will announce once this has been fixed.

#Skyline - October 17, 2018, 3:01 pm

If you run into any issues or bugs please inform us by submitting a support ticket on our website.

Neta - October 18, 2018, 10:38 am

This VPN still up and going strong? I just downloaded it and signed up etc.

SecureOp - October 18, 2018, 5:38 pm

I really like the thread layout, colour and presentation along with GUI design of Whoami VPN itself.

Will give it a test some time soon, probably even purchase subscription when finalized.

Yes our VPN is still going strong. Currently just making improvements and bug fixes before moving onto our next step of development.

And thanks for signing up, please submit a support ticket if you have questions or any issues with our service.

Thank you, we have put a lot of work into our VPN so far, and we have a lot more coming.

? Heisenberg ? - October 20, 2018, 2:39 am

probably even purchase after vouch

Thank you.

Right now we will be adding more servers !!!!

If you want a specific location added to our VPN please let us know.

#Skyline - October 22, 2018, 4:54 pm

New locations will be deployed sooned.

Remember if you have any recommendations on server locations, please let us know and we can look into it.

VPN development has been coming along so nice. Get keen for future updates.

#Skyline - October 23, 2018, 8:32 pm

Feel free to make the most out of our VPN for free with no data limits while we're still in beta

development.

Announcements regarding new locations will be made from all our social/forum accounts, so stay tuned.

YourExtra - October 23, 2018, 8:42 pm

Does this vpn keep logs or what?

Just checking if it does and when will this be sold ?

Whoami VPN now has 20+ servers available to choose from with no data limits !

Feel free to make use of multiple locations while we are still in beta.

Thread closed, beta finished.
