Thread: [BLUFFER \[uid=1382464\] - EXPOSED](#)

BCTech - May 30, 2018, 8:59 pm

Profile UID: uid=1382464

Thread of sales:

(Can't post links yet, will shorten with Prnt.scr)

Proof:

HE JUST CLOSED HIS SALES THREAD AFTER I TOLD HIM I WAS EXPOSING HIM:

Prnt.sc/ougjc <---

HIM CONFIRMING HE DOES NOT KNOW IF HIS METHOD IS EVEN WORKING: Prnt.sc/joueg8
OTHER MEMBERS SAYING FTP IS DOWN (METHOD GOT PATCHED FOR FTP ON DOMAINS, YOU CANNOT CHANGE NAMESERVERS EITHER): Prnt.sc/jouek1

HIM CLAIMING THAT HIS DOMAIN METHOD IS STILL WORKING: Prnt.sc/joud41

HIM EXPLAINING THAT THERE ARE "OTHER SITES" (uses a Google Search Dork to find iBan websites?) to use the method? This is public? Prnt.scr/jouhnr

I conclude that Bluffer is selling methods that he know's are not working right now, as I told him I was exposing him he finally closed the thread and told me I was cut off from support of his product (I paid for updates). So due to me asking the seller of a product why he would not give us updates and is expecting his clients to do the hard work, I was kicked out of his discord after I've purchased a product for telling him to release a WORKING method.

Here is a screenshot of me asking him if hes still selling a method that is not working:

Prnt.sc/jouiiw

Prnt.sc/jouire <--- I found this the best response yet. He DID NOT want me to post this for a reason obviously.

If your going to sell shit, make sure it works. If it gets patched, remove your sales from it or your just scamming people.

UpTheCrust - May 30, 2018, 9:03 pm

You shouldn't pm the mods

BCTech - May 30, 2018, 9:04 pm

Ok cool. Just trying to watch out for you. Staff don't get involved in disputes and you can end up with at least a warning for pming them about a dispute

Thank's for the info, I hope users like this get stopped. He closed his thread right before I posted this after I messaged him to try and cover up, but what about all the generation of revenue he gained from the sales prior to this? The method stopped working awhile ago? Lol. It's just that stuff man that's sad people can't learn to sell shit right.

Imfao

Bluffer - May 30, 2018, 9:08 pm

As you can see by the chat logs, I've not been able to confirm method is patched, that's why sales haven't been closed at this point. However because OP wants the drama I figured its best to avoid it and close sales thread for now because as I've said several times I will never knowingly sell a product that is patched.

I'm not going to argue with you on Discord that's why I said I'm done discussing it since you want to bring it on site.

Anyways that's my response, anything else?

BCTech - May 30, 2018, 9:38 pm

Theres a screenshot where you specifically ask if anybody had any update and we said no. And you stated in your closed thread you will "refund the user that bought your product an hour ago". So why did you wait to refund him UNTIL I decided to push this thread on you when you apparently knew that something was wrong? People have been posting in that specific Discord server about your method not working via FTP, just because you can register a domain that you can't do ANYTHING but redirect mail with is supposed to be a method? LOL

Vanderbilt - May 30, 2018, 9:52 pm

Methods stop working after a while. Dont know why ur making a big deal out of it. I have know bluffer for years and he is no t the one to knowingly sell bs methods. I hope this gets resolved. Bluffer is a good guy. For you, I think u are a troll or u are taking shit too seriously, thats why I negged you

Greg???????????????? - May 30, 2018, 9:58 pm

Bro you seem like such a cancerous customer to deal with judging by your replies to him. I've seen bluffers methods before they're legit.

BCTech - May 31, 2018, 11:39 am

The method did work, it does not anymore. He continued to sell the product afterwards. Are you morons?

Nuclear Power - May 31, 2018, 2:20 pm

I can vouch that he did indeed give me that refund. I purchased late last night and when I woke up I got refunded. Seen that he said it needed to be updated. I can respect that he atleast refunded me without me even saying anything to him about it. I believe bluffers has good business practices. Just from my experience.

BCTech - May 31, 2018, 4:18 pm

Of course he refunded you because I told him I was going to post this thread. He even stated he would, the screenshots are in this thread. My point behind it all is what about all the customers BEFORE YOU That purchased this method? They didn't get refunded but they bought this. So your lucky to be refunded by what about the method that no longer works? Lmfao.

Nice of you to step up to your word, I dont know why OP is being so ignorant about this.

Bluffer - May 31, 2018, 6:30 pm

On May 21st, 2018 through our Discord server, users stated to me they could not connect to FTP on the domains they registered. Knowing previously that we had an issue with the site we use where domains wouldn't register properly for a few days, I figured this would possibly be an identical case of give it some time and it will fix itself, not the method being dead. At that time I did not have time to check the method out.

Still I wanted to investigate to confirm the method is still working my self however I did not have time as I had a busy week but on May 28th I finally had some time to attempt the method on the site mentioned in the ebook, I registered a domain and it looked like everything was working although I knew there was still a question if it will connect to ftp since that's what was mentioned in the chat. I tried to change the FTP password so I can connect and unfortunately it wouldn't even let me put in a new password. I figured I would just leave it for another day, after all time has never been of the essence with this method.

Yesterday, May 30th, 2018 I mentioned to Osama that I'm testing the method.

He then went on a rant after asking me if sales are still open, I answered yes because of course to this point I've had no reason to close them, I've not yet confirmed the method is dead at this point, and if I had then the sales would've been closed already.

I can confirm right now that the method is dead so the sales thread will not be opening until the update is ready.

I'm going to do another test of the new site I've found when I get a chance.

In closing I'll say this, I do wish I closed my sales thread when there was a question sorrounding the method working or not but I didn't think it made sense at the time. Plus I believe there was only two sales or so between the first time somebody mentioned the problem (May 21st) and today (May 31st) and you can take this post as an offer to refund anyone who purchased within that time frame if you purchased before that I wont offer a refund but can offer a discount on any of my other products and also the free update of course once that's ready.

OP could've easily been patient like everybody else and waited until the update is ready but instead he has to be pushy and annoying.

He titles this thread "Bluffer EXPOSED" well lets expose him back okay?

Firstly, to prove its him, I'll show you where he mentions his Discord in our Skype conversation:

1) He's a carder who brags about being under federal indictment -

2) He's a multi and wanted to buy my account -

I'm going to end this here and that's all I'll say on here. I'm also going to send a link to staff of this thread with that proof and hopefully they'll take care of him, there's really nothing I can add other than to say yes I should've closed the thread but I really didn't know method was dead. That's it.
