believe it or not, thank you.

Good job hosting a service like this. Helping with a crypter and not assisting with malicious use does contradict eachother though.

You can encrypt the files to prevent Anti Viruses picking up your remote administration tool on your own computers. ;)

Thank you! (:

Oh well, was l33t before but lost my account because i logged in at a mates house..... (stupid i know)

xShowTime - February 2, 2019, 6:55 pm

Only for upgraded users? How much would you charge for setting up a rat for me.
