Thread: [Rate Limit per every search](#)

BITCHLESS - May 31, 2018, 2:49 am

Every time I want to search something I'm getting "Error 1015 Rate Limit". I can't search anything because always I'm getting this error.

Angel - May 31, 2018, 2:55 am

same here I have this when I am trying to look at someone profile or mine.

Omniscient - May 31, 2018, 3:33 am

PM me the URL you're being blocked from. It shouldn't be search. Unfortunately we needed the rate-limiting to block attacks. It's a new feature and we may have to adjust it to minimize false-positives. But you also might have to adjust some of your browsing habits.

For now you'll have to wait 24 hours for the ban to be lifted.

Elitas - May 31, 2018, 5:02 am

Yep, I also got this a bunch when viewing people's profiles.

I'm guessing this is in order to prevent automated activity though.

I get this error when viewing anyone's profile. Just started for me this morning. I can't PM you as I can't view your profile either.

TIL, thanks ?

I-I-I - May 31, 2018, 6:04 pm

It happened with me yesterday when I had 2 tabs of HF open. One of the main forums and another of wiki. When I was browsing wiki , I got that error. I contacted staff through Contact form and that was removed after some minutes.
