Thread: [IP blocked 2 times](#)

Zayn. - May 31, 2018, 12:14 pm

First my school wifi now my home wifi, so I'm writing from my last choice of Internet, phone 4G.

I get Error 1015 Rate Limit and it's annoying. As a person that does a lot of business on HF I need to check my PM every 30sec and so, and sometimes I wake up with 10 PMs, which I can't answer to all as soon as possible because I must do it very slowly.

Will appreciate if there can be a fix implemented. Otherwise I'll try to adapt.

Best Regards,
Zayn

Makes sense. Thanks.

Also... do you normally run any userscripts/extensions for HF?

Dark Smile - May 31, 2018, 12:25 pm

Happens to me today or yesterday once, but it was block of 10 minutes maybe. After it HF works again.

TRH4CK - May 31, 2018, 12:47 pm

Same goes for me. I do not have access to any profiles (it says rate limited too).

Xerotic - May 31, 2018, 12:55 pm

Do you use any userscripts/extensions for HF?

8BallPoolKing - May 31, 2018, 1:04 pm

I am also facing same issue but only when i try to view some profile
when i try to view some thread its all fine
I am not using any script

Eagle™ - May 31, 2018, 1:19 pm

I got this also, can't view any profiles.

Pretty weird.

Pretty weird.

Seems to be loading fine for me but I think it was late last night and earlier I did get a few captchas but that is explained in Omniscients thread.

I use HFX at the moment. Could that be the cause?

Xerotic - May 31, 2018, 2:03 pm

(May 31, 2018 01:51 PM)Zayn. Wrote: [\[CITE\]](#) I use HFX at the moment. Could that be the cause?
It could be. HFX sends background requests to HF. So every time you load a page you are sending multiple requests instead of just one.

I experienced the same thing on my mobile when trying to view someone's profile.

Originalkillit - June 1, 2018, 3:11 am

Same here I get this error when trying to view someone's profile and after some time I am suppose to solve CAPTCHA so annoying please fix it HF

sonex - June 1, 2018, 4:31 am

Just happened to me as well after normal browsing on an iPhone. Though I just refreshed and it was gone.

Marwiz - June 1, 2018, 5:31 am

I registered yesterday and I thought hf don't allowed my country, I wait for another hour then the problem was solved.

kookur - June 1, 2018, 5:36 am

Yeah I'm really struggling sometimes it shows me that error and then I switch to my phone data for it to work.

PS: It only happens when I try to view someone's profile.

AlphaTurtle - June 1, 2018, 5:40 am

I get the same thing as well.
Not able to access the profile page of anyone
No plugins/extensions.
