Thread: [Extremely Simple double way percentage calculator](#)

Dir50 - June 2, 2018, 2:12 am

[Video: <https://youtu.be/g-li7rArJGU>]

This is an extremely simple percentage calculator i didnt find any thread about.

We have 2 methods in this tutorial.

What is X % of Y or X is what % of Y

You can download my source code from tutorialbox :

<https://tutorialbox.org/how-to-create-a-double-way-percentage-calculator-in-vb-net/>

???

CodeAssassin - June 3, 2018, 3:40 am

This is not tutorial you explained nothing. Tutorials teach, this is just a video of you coding a basic app

Dalvik - June 3, 2018, 4:11 am

Ah... VB where you don't have to parse strings to integers beforehand.

I understand completly bro I can do this in my sleep, What i mean is your teaching nothing to someone new. Try to think like, no one knows what your doing. So explain everything as if the person has had no prior coding knowledge and base your "tutorial" on that. Why did you choose to use a winforms app instead of just a console app (which is all thats needed) etc. Basically like i said become a tutorial not just a look at me video..

You do with Option Explicit, but nobody sets that and I haven't touched VB.net in 5-7 years.

Well you can do that in your sleep but many people not.
Anyway I completely understand you and I will try to explain more detailed on next one.

Thank you anyway.

No worries, Also i appreciate you are here to help. I really appreciate your thinking and wanting to help, don't stop :)

Good luck, If you need any guidance on a great tutorial, Think of it like a story, A start, middle and end. What lesson are you trying to teach.

All the best brother.
