Thread: [Anyone else having to verify themselves multiple times?](#)

Every single time I go to post a reply to something I'm hit with this. I've cleared all my browser history back to the beginning of time so I'm not too sure what's going on.
Anyone else experiencing this or know a fix?

Just when I open the site in a new tab. Not when I make a new post.

Because of an attack last week Omni turned up security. Eventually I assume it'll go back to normal.
