Bought a subscription, this is a very good esp! :)

irving.gp - June 4, 2018, 8:58 pm

What exactly is this for, my friend? Could you please explain to me, I don't understand.

(Jun 4, 2018 08:58 PM)irving.gp Wrote: [\[CITE\]](#) What exactly is this for, my friend? Could you please explain to me, I don't understand.

Its a packet based radar I'm assuming. It'll act as a normal radar on an alt monitor; typically a computer, and give you visual information such as player locations and stuff. Never used nitro spy specifically tho so couldn't give the specifics.

irving.gp - June 4, 2018, 9:10 pm

Thanks a lot, buddy, but what's the point of tracking down where the other players are?

Copywriter - June 4, 2018, 9:18 pm

Dang, this price is actually pretty cheap.

RIP PUBG

irving.gp - June 4, 2018, 9:20 pm

(Jun 4, 2018 09:19 PM)xoRevealz Wrote: [\[CITE\]](#) Not only are you tracking down players, you're able to see where weapons/armor/items are, shows drop location of care packages, shows all vehicles and the list goes on etc.I understand, this is for getting items in the games?

irving.gp - June 4, 2018, 9:42 pm

(Jun 4, 2018 09:40 PM)xoRevealz Wrote: [\[CITE\]](#) When you play PUBG you have to find players, weapons, armor, and cars etc. This radar allows you to find all those I mentioned as soon as land. Thank you very much, I understand.

lol - June 6, 2018, 6:16 pm

Is this undetected or is it impossible to get banned? Cos of second monitor, etc...

xor00t - June 6, 2018, 7:32 pm

(Jun 6, 2018 06:16 PM)2SUS Wrote: [\[CITE\]](#) Is this undetected or is it impossible to get banned? Cos

Since this is for Xbox One only, there is literally no way for this to ever be detected :)

GUNZ™ - June 7, 2018, 1:20 pm

Vouch for Nitro Spy. The radar is over powered and it's such a cheap price. Support is also really helpful and nice :)

(Jun 2, 2018 08:00 PM)xoRevealz Wrote: [\[CITE\]](#) Last week my team started selling our previously private packet-based radar for the Xbox One. The radar was last updated on June 1st, 2018. We heavily based our design on the dead radar known as PacketMap and use a lot of the same icons/images. Come give it a shot by taking advantage of our free 24 hour trial - you'll definitely prefer it over the alternative PUBG cheats.
nice

Very interested in this. Do you need a second screen to display everything or will it show on the tv you're playing on?

You need a second screen (ish). This application runs on your computer, so you should have your laptop open or a pc nearby while playing PUBG on your Xbox One.

Using that informtion it displays all the players, cars, airdrops and loot within 1000m diamter of your player
