Thread: [Does Facebook already get rid of this simple hole ???](#)

silentcuteb0y14 - June 3, 2018, 9:07 am

Fisrt sorry if my english is bad.

I just want to know if facebook already get rid of this simple hole.

Late April or march and last year this is still working. Actually i can hack instagram account well i will not say how?

But actually there's this facebook where you can actually LogIN on Facebook application using Instagram APP

Just First Clear all data of messenger, facebook and instagram LogIn the instagram account and after that just go to menu without clearing the instagra so it will run on the background and then when you open facebook app or messenger you can login the FB account.

But now this month of may and june this not work anymore.

DO they get rid of this already ?
