Thread: [Full Rights/Source/Setup to Netflix Auto-Replacement Bot w/ 100 accs](#)

crispy - June 3, 2018, 2:48 pm

It's a Telegram bot, and you can purchase keys through selly.gg for 1 month, 1 year, and lifetime.

How it works:

1. user purchases key from selly.gg, gets emailed the serial code
2. user redeems key through bot
3. user can "generate" (really it's just pulling an account from the backend) a valid Netflix account
4. user can swap their account (auto-replace) any time through the bot. first bot checks if login fails, if so, it provides a new account

all automated. since it uses selly.gg you can even have affiliates. can't be hacked since bot lies behind Telegram which adds an extra layer of security.

if you have netflix accounts in bulk, this is the way to go for you. I'll show you how to load accounts. If not, I can show you a supplier for 0.09c/acc.

price: 300\$ (selling two copies)

price: 400\$ (one copy. meaning, you'll have no competitors with the same source)

you'll never see me sell this here. coded by me. I just don't have time to run it

This is pretty expensive and there's no proof of working. But definitely interesting.
