"5 min rotate"

Does it means it will Change every 5 min?

Castro - June 4, 2018, 1:53 pm

Would like to try this...can I try for a couple of days to see if it works for my application correctly?

Thanks

no geo target atm.

You use them as you normally would. Every web request will spawn a new node(ip)

Well I would not say these work for all sites if its not Geo targeted. Some sites will just block or ban accounts made with other geo locations. But for most applications I see this being a great deal. What size is the ip pool?
