Thread: [A!DS' Writing Service \[Essays\] \(May Expand in the Near Future\)](#)

A!DS - June 4, 2018, 12:39 pm

I plan on opening up a homework service mainly focusing on essays and research papers currently. I am currently a second year University student who has passed several high level English courses in my time at school. Although my major is not english or literature based it has always been one of my strengths and something I have always been very confident in. Many of the papers I have done in college have been done either 2 days or even the night before the due date while still being able to achieve an 'A' in the gradebook.

For right now I will be focusing only on papers as I do not know how far my knowledge goes in other subjects such as math and science as I am still pursuing my degree. For these papers I will be offering a rate of \$10 per page as I need to get some customers in order to increase my vouches. If you would like to get in contact with me please PM me as that is the best way to reach me currently.

TOS

1. I reserve the right to deny anyone service without explanation. I will respond and make sure it is clear that I am not going to be completing your assignment.

2. Any chargebacks will be viewed as a deal dispute and I will follow-thru on posting the dispute here.

I believe I have one vouch so far. Get in contact with me so I can increase this number.
Thanks!
