Thread: [botnet lists for ssh and telenet](#)

RxquestBaked - June 4, 2018, 5:52 pm

Hi, I need lists for ssh and telenet please! if anyone has some.

qdawg - June 6, 2018, 4:47 pm

No body is gonna give you their scanned results why dont you buy a server and scan for your own list instead of begging people you dont know for things they could find useful

lol i could care less im just trying to give you advice because if you state you are willing to pay more people will be willing to share their lists with you. i suggest only buying off trusted users tho to prevent being scammed or somethign

You can use kali free tool masscan is easy

masscan IP/rang /8 /16 /24 -p port

?

Thank you very much

Zmap is better

Lmao If you still need anything mind checking t.me/exploitheaven ? he should have anything you need
