Thread: [\[Good Pay\]Coder for Cracker \(Must be able to add this one function more in thread\)](#)

.iniFile - June 5, 2018, 2:42 pm

Need a coder. Budget \$250.

I have a code explanation from a mobile app that generates a token. This is the same site I want the cracker for. Since mobile apps are made in java, I found somebody already to give me the code explanation of this. All you have to do is make a cracker for the site, and convert the java explanation to the language you are coding in.

For my budget, I want

- a working cracker
- updates for whenever the site changes(free or paid, but I dont want a ridiculous amount to pay every time)
- the explanation and cracker to keep private (the explanation of how the token is generated. I pay a good amount of money for it)

Payment: Bitcoin

DO NOT PM ME IF YOU STILL HAVE SCHOOL OR SOMETHING ELSE. I WANT SOMEONE WHO IS READY TO WORK.
SERIOUS PEOPLE ONLY.

Juffar - June 5, 2018, 2:51 pm

Send me the website in question and I'll have a look at it.

FamousHater - June 5, 2018, 2:52 pm

lmk which site this is for

(Jun 5, 2018 02:52 PM)FamousHater Wrote: [\[CITE\]](#) lmk which site this is forHonestly site isn't very hard at all. I've made it so many times with Sentry. Its just that the app has a token and all that. You will only need to be generating like 3 other random things which include the guid and others. But I will Pm yah.

.iniFile - June 13, 2018, 3:53 am

I still need this. Yet again a person I had has had a real life problem. I need someone dedicated to doing this. Budget is increased to \$250.

.iniFile - June 14, 2018, 4:25 pm

I still need this. I know there are people here who can do this!

.iniFile - June 16, 2018, 12:15 pm

Still in need of this. Please PM only if serious.

.iniFile - July 22, 2018, 3:01 pm

STILL NEED THIS. Budget can increase of course.

.iniFile - July 27, 2018, 4:47 am

My client still needs this. If anyone experienced enough wants to try, please PM.

Laravel- - July 28, 2018, 6:00 am

Let's discuss about this, PM me the details of this. I'm into web developing and have done web-based checkers/crackers.

Oblivious- - July 30, 2018, 6:28 am

Pm me the site and I'll see what I can do

Don't know why people think this is a site. Its a mobile app. If you don't understand Java don't bother.

I just typed site, You're looking for a way to abuse the POST method on the mobile application which is also applicable for websites that have login forms. sorry for the wording.

There is a reason I don't want the website login. I'm paying so much and even more because I want a functional cracker from the mobile app.

Woes - July 31, 2018, 4:14 pm

PM me more information. I feel like we've worked together already though.
