Sales thread (now closed): <https://hackforums.net/showthread.php?tid=5843999>

Proof of purchase: <https://imgur.com/a/DpgCnSo>

The method was literally a bustabit script and ewhoring methods that are public, I can post the book here if people would like proof and if that isn't against the rules. He has now opened a new sales thread but claims it's a different method, either way take caution when dealing with this user or purchasing his methods.

Btw I only bought his bullshit because he was calling out all other sellers saying their methods are shit and don't work. Sure enough his was public, biggest hypocrite ever lol

?heshire - June 6, 2018, 11:15 am

Thanks Fade! This is definitely good to know. Good lookin out.

WatermelonHaze - June 6, 2018, 11:15 am

Greasyy, Don't buy get rich quick schemes guise lmao.

Lukas - June 6, 2018, 11:20 am

Good thread.

I just don't understand why he wouldn't say it's not an an E-whoring method if it's not..

Techius - June 6, 2018, 11:33 am

Finally, a community alert. Now I can refute the bullshit that you and your cronies are finally spewing. A place to defend myself where everyone can see it, not just a bunch of invertebrate slaves who are loyal to some pixel images and some virtual allegiance.

To get started: I'm not selling public methods. Fade thinks because he buys one thing, he magically has the keys to access everything else for free. No... that's not how this works. He hasn't actually bought my book, which I'm actually selling. Yet he's still flinging these accusations willy nilly.

What I'm selling in my book are 3 overall methods, but they break down into "sub-methods" if you will. These have all been written up by me and they're all invented by me. He's destroyed my thread because I made a thread which directly describes him and the work he does (even though it wasn't actually directed at anyone in specific). There is a problem with people selling things, using fake vouches to help boost it up, and then using their groups to specifically target people who actually speak the truth. This is just that in action.

The overarching methods are People. Services. Goods.. He wouldn't actually know this though, because he hasn't bought the book I'm actually selling. He's making up stuff. If he were to release the book (if he were to be actually dumb enough to break HF rules on leaking) you would see that what he has is about 10 pages. What I'm actually selling is close to 50 pages long information.

Fade has made claims on my thread that he bought my methods when he hasn't actually. He's

using his newly found super knowledge, in which he can get access past Rocketr to see methods without actually paying. But he's still actually lying. If he looked at what he has vs. what I'm selling, you would see that there is a large different in not only the type of content but the quantity of it as well (which I mentioned with the pages).

I wouldn't trust his words about my methods. He's not a very trustworthy bloke. Look at his threads. Oh, it's a sales thread! Promising everything on a golden platter for only \$200. He's absolutely fabricated what he said about the method I'm currently selling. He's sales trashed, but not only has it been him who has done it, he's invoked his whole "Terminal" goons and people he's associated with to start attacking me.

Squalo, to get started, was asking loaded questions with a heavy implication behind them to try push an agenda. When I answered his questions in the most honest and direct manner, he would still accuse me of lying. He's called my threads and methods shit without having actually bought them. This constitutes a form of sales trashing because he's making brash and false allegations about my product without having actually owned it.

To move onto the "Terminal" goons. They have actually started to destroy my reputation. User: Chief. has already -4'd me along with Squalo.

The second Terminal group person to attack me was wraxu who called it garbage without having bought it. How can you make a conclusive opinion on something without having actually bought and tried it first? So he's sales trashing.

The third person was Lukas, who was comparatively not so bad, but he's still incorrect. He's sales that sales trashing was fine, despite it being the worst form of it there actually is. I wonder why he was defending it?

Oh! Is that Terminal I see?

There is clearly a group effort to try and attack me and to try force me off the site. They're going to try to destroy my reputation. Destroy my threads. Continue to lie. Make bogus community alerts, which actually detract from the actual facts.

Anything Terminal/Fade-associated people say about me should be taken of a grain of salt. There's clear evidence of them targeting me.

It's not a conspiracy. It's a matter of fact. Everyone who has posted in this thread and the other one making disparaging remarks about me and my product have been part of a group. There's clearly a coordinated effort to try destroy me. Otherwise my reputation wouldn't have dropped by -9 in a matter of minutes.

Ayy my mention. Me being in Terminal has nothing to do with me negative repping you. I negative you because you're highly incompetent and you're selling bullshit. \

You went from selling a eWhore and BustABit method to selling a 40+ page eBook overnight that I can guarantee you didn't write.

God you're so dense it hurts. I literally posted a receipt of your previous method I bought which you now closed. THOSE methods were public, I don't know what you're currently selling but I simply advised users to take caution because your previous method was public. If you cannot understand what I'm saying, please leave the forum because you shouldn't be allowed to use the Internet.

This won't go well for you. People do not have respect for ebook sellers here.
The more you post, the worst it is for you.

Techius - June 6, 2018, 11:47 am

If it was about the other method, then why not just merely keep it on the other thread before it closed?

No, this is only your excuse. What you've done is transferred some bullshit over from one thread to another, and you've absolutely fucked sales.

You claimed to have bought the method I'm currently selling. Otherwise, you couldn't have said that it was public (even though it's not and all things in there are written by me).

Okay so assuming that a general page is around 500-550 words
Quote:By default, a MS Word is set at 8.5 x 11 inches with 1 inch margin on four sides. If you write in 12 point Times New Roman font, that'll be about 500 – 550 words per page. So a 175 paperback pages novel will be about 100 Microsoft Word pages, i.e. one Microsoft word page is approximately equivalent to 1.75 novel pages.

[Source>>>](#)

That would be 20,000 words in a 40 page eBook. According to WordCounter.net that would take 66

hours.

Quote:How long does it take to write a 20,000 word essay? It takes about 66 hours and 40 minutes to write a 20,000 word essay. How long does it take to write a 25,000 word essay? It takes about 83 hours and 20 minutes to write a 25,000 word essay

[Source>>>](#)

I doubt you wrote that full guide all last night after being called out for selling public methods.

I could be wrong and you could've railed some Adderall and finished the whole thing but I highly doubt it.

Also how about you stop selling bullshit?

He stated that the members that you are mentioning that are in terminal are uncovering your scheme. not that the whole group is after you. contrary to your belief people can be in a group

You have to provide your vouch copies to the two main accusers who also have access to your old method.

That way they'll be able to compare and contrast the two.

?heshire - June 6, 2018, 12:50 pm

I think you are getting the idea wrong. This is not a witch hunt this is you being accused for something that if true the community would benefit from being notified of. If your method is actually legit and written by you, then Fade would have no reason to continue this thread. Don't let your own delusions get in the way of proving your theoretical innocence.

Techius - June 6, 2018, 1:04 pm

Theoretical innocence? I am innocent. I've been accused of not writing my books, and so on.

Everything Fade and his goons have been saying (including you) is flagrantly wrong.

I want to see proof that I'm selling the same methods.

?heshire - June 6, 2018, 1:07 pm

well the only way to prove that is to leak the book which is why im saying you should provide a review copy to Fade. If it is in fact not a shit public method, then Im sure this thread will be trashed and an apology will be made.

When someone gets exposed, leaving negative reputation on their profile is pretty normal -- normal enough for any "normal case."

The sooner you can realize and accept the fact you're a sociopathic liar, the sooner you can apologize and develop a new, private method that no one can call you out for.

You said the book was public. Why not buy the book and run it through your plagiarism checker? If you're going to make a claim, at least have it try to be correct.

How did you actually even get the book in the first place (if that's actually it)? You haven't bought it. So you stole off me. Copyright violation.

You can pay me by going through the thread, otherwise you're stealing.

How do I know that you haven't just put the same screenshot together? Also, if you're going to blur, do a better job of it than that. That's just hopeless.

Man, I can't believe terminal hacked this dude and forced him to sell shitty public methods. Obviously the conspiracy against him is real

You said the book was public. Why not buy the book and run it through your plagiarism checker? If you're going to make a claim, at least have it try to be correct.

How did you actually even get the book in the first place (if that's actually it)? You haven't bought it. So you stole off me. Copyright violation.

Stop being a fucking idiotic. You got caught, no one believes you, you're embarrassing yourself. You don't even understand how copyright works, you're literally trying so hard to save yourself over a \$25 ebook.

Can't believe everyone fed this troll.

He's only continuing the conversation to get his product more exposures and sales.

He's trying so hard to convince people his method is unique, which only gets the curious people to purchase.

The way he talks already tells you so much about himself. Dude is desperate for money at the moment so whatever sales he can get is good for him.

(Jun 6, 2018 11:33 AM)Techius Wrote: [\[CITE\]](#) Finally, a community alert. Now I can refute the bullshit that you and your cronies are finally spewing. A place to defend myself where everyone can see it, not just a bunch of invertebrate slaves who are loyal to some pixel images and some virtual allegiance.

To get started: I'm not selling public methods. Fade thinks because he buys one thing, he magically has the keys to access everything else for free. No... that's not how this works. He hasn't actually bought my book, which I'm actually selling. Yet he's still flinging these accusations willy nilly.

What I'm selling in my book are 3 overall methods, but they break down into "sub-methods" if you will. These have all been written up by me and they're all invented by me. He's destroyed my thread because I made a thread which directly describes him and the work he does (even though it wasn't actually directed at anyone in specific). There is a problem with people selling things, using fake vouches to help boost it up, and then using their groups to specifically target people who actually speak the truth. This is just that in action.

The overarching methods are People. Services. Goods.. He wouldn't actually know this though, because he hasn't bought the book I'm actually selling. He's making up stuff. If he were to release the book (if he were to be actually dumb enough to break HF rules on leaking) you would see that what he has is about 10 pages. What I'm actually selling is close to 50 pages long information.

Fade has made claims on my thread that he bought my methods when he hasn't actually. He's using his newly found super knowledge, in which he can get access past Rocketr to see methods without actually paying. But he's still actually lying. If he looked at what he has vs. what I'm selling, you would see that there is a large different in not only the type of content but the quantity of it as well (which I mentioned with the pages).

I wouldn't trust his words about my methods. He's not a very trustworthy bloke. Look at his threads. Oh, it's a sales thread! Promising everything on a golden platter for only \$200. He's absolutely fabricated what he said about the method I'm currently selling. He's sales trashed, but not only has it been him who has done it, he's invoked his whole "Terminal" goons and people he's associated with to start attacking me.

Squalo, to get started, was asking loaded questions with a heavy implication behind them to try

push an agenda. When I answered his questions in the most honest and direct manner, he would still accuse me of lying. He's called my threads and methods shit without having actually bought them. This constitutes a form of sales trashing because he's making brash and false allegations about my product without having actually owned it.

To move onto the "Terminal" goons. They have actually started to destroy my reputation. User: Chief. has already -4'd me along with Squalo.

The second Terminal group person to attack me was wraxu who called it garbage without having bought it. How can you make a conclusive opinion on something without having actually bought and tried it first? So he's sales trashing.

The third person was Lukas, who was comparatively not so bad, but he's still incorrect. He's sales that sales trashing was fine, despite it being the worst form of it there actually is. I wonder why he was defending it?

Oh! Is that Terminal I see?

There is clearly a group effort to try and attack me and to try force me off the site. They're going to try to destroy my reputation. Destroy my threads. Continue to lie. Make bogus community alerts, which actually detract from the actual facts.

Anything Terminal/Fade-associated people say about me should be taken of a grain of salt. There's clear evidence of them targeting me. Everyone is in terminal Imao, you aren't being targeted, next time don't sell public methods.

I honestly think he might be trolling at this point because I could never imagine someone being as idiotic as him. Anyone who purchases his product after this thread + his open deal dispute, I have 0 sympathy for.

He seems to have a whole lot to talk about when it comes to talking about his public methods. Unfortunate to see this, be careful when dealing people!

haha fade u fucking hypocrite. your method u sell is known by many, so how r u different?

FamousHater - June 9, 2018, 4:20 pm

how u lose 60 rep in a few days lol

he should of just admitted he was in the wrong and tried selling a public ebook that he tried his best at to reword instead of making a big deal out of it when he knows he is in the wrong.

The method was literally a bustabit script and ewhoring methods that are public, I can post the book here if people would like proof and if that isn't against the rules. He has now opened a new sales thread but claims it's a different method, either way take caution when dealing with this user or purchasing his methods.

Btw I only bought his bullshit because he was calling out all other sellers saying their methods are shit and don't work. Sure enough his was public, biggest hypocrite ever lol

Who the fuck are you to complain about selling public methods.

You do it yourself lmao.
