Thread: [Ratting Setups| High Quality Setups, Free Crypt | www.fsec.xyz](#)

Killer - June 7, 2018, 6:12 am

? Hello HackForums Community ?

I am making this thread for anyone who want's to learn how to rat.
Since i'm kind of a new user i wan't to give a FREE tutorial on how to use both Quasar and NJ RAT to the first person who replies to this thread saying they want a tutorial on ratting from me.
Everybody after that will have to pay me \$15,- BTC for the tutorial through discord or jabber, or \$8,- BTC for the entire tutorial sent to you at once without any extra help.
So be quick on replying if you want to get the tutorial for free.

I will pm you my contact details so i can teach you all about ratting
I will make sure that you understand ratting completely before breaking contact with you.

One last thing that i want to add is that i have been ratting for a while now, so don't just look at my rep and think that i'm lying
and that i can't teach you anything or i don't completely teach you everything, because i will teach you everything about these two
RAT's. I just want to make myself bigger on this forum so i have to start somewhere right. And what better way to do so then to show
people that i am legit first.

Anyway, that's all so if you want this tutorial be quick and you can get it for free.
Otherwise it will cost you \$15,- BTC for help through discord or jabber, or \$8,- BTC and i will send you everything at once so you can figure it out for yourself.

Vouch copies:
