Thread: [I need to hack wifi networks.](#)

Morarunarcis - June 7, 2018, 12:13 pm

Somebody knows an Android App for hacking wifi networks?

P. S. No root

If not, is it possible hacking wifi with cmd? (no netsh wlan show profiles.
?)

Juffar - June 7, 2018, 12:24 pm

There is a new app that recently was released. It's called SecreWifitHackerApp. You can even get into wifi's that is located in other countries. Do not share to anyone outside this site!

kiwi - June 7, 2018, 12:29 pm

The simple answer is 'no'. There's no program that will just automatically crack a WPA/WPA2 code for you.

Check out the [Wifi Cracking section](#), you'll have more luck there.

First of all, your title is wrong.

You don't need to hack wifi networks, you just want to. Big difference right there.

Let me remind you this is illegal.

Second, cmd is not some kind of hacking tool.

You really think Microsoft implemented a command to hack any wifi you want?

Wake up.

As kiwi mentioned. These easy "touch a button and hack everything" apps don't exist.

Kind regards,

~WT

Do not trust this ? juffar ? a member who posted above me.

There is no app which will help you hack any network.

But instead this app will hack you since it's malicious in your terms a virus in android. ?

Hack forums doesn't support ill-legal activities.

If you want to learn for educational purpose then take a look

No worries, Juffar was just being ironic. Take a closer look at his post

ampamer - December 31, 2018, 9:29 pm

it does not exist in Android
