User: Blatngu

So about 1-2 weeks ago I decided to purchase this members botnet setup service hoping I was going to get at least half of what I asked for, guess even that is too much to ask for.

Right off the bat I knew this was going to be a scam fest after seeing this dude's response time and lame excuses. After about 3 days of waiting he finally got back in contact with me saying that he was setting up my botnet and after day 4 I finally received my files. Didn't think a big deal of it since the wait was finally over and I could begin. Turns out we were just getting started with the problems.

He promised to sent a FUD crypt but sent me a stub that wasn't even crypted and tried playing it off casually:

So now I had to waste another 4-5 days trying to get the crypter off him. This dude would give about 1 solid response per day so I really had to try my best to fit the best question I could so that I could get the best response for the day from him before he went back offline .

Now after 3 days of wasting my time asking for a crypt that he promised on his thread he goes on to threaten me with cutting off my support for asking for what was promised in my package LOL.

Finally after 5 days he decides to crypt my file, if only he didn't use a free crypter.....

^^^ Notice how he only responds "it's persistent" that's because he doesn't want to admit it's fud, this same thing happened when I asked if it was crypted, he casually ignored it and responded to other questions that seem to be easier for him.

And to top it all of he changed the password of the login for the botnet since I didn't change it yet (wasn't finished setting up). Dirty scammer, I will ONLY be accepting a FULL refund.

Dear Maxo Kid User,

Let me tell you some things..

1) I haven't threaten you to cut support I don't know where you saw it. The only thing I said is that if you were to open a scam report I won't anymore help you as stated in the TOS.

2) When you bought it, there is STATED that setup takes to 24 to 48 hours, I've delivered your package in 24 hours. You gave me login access to the hosting area after one day. Also I've delivered all except the crypted stub that I gave you few days later because of a crypter problem and I had to renew it.

Screenshot:

<https://i.imgur.com/e9kq9vur.jpg>

3) You told me that it wasn't FUD, i was unable to scan it at the moment because all crypters scan service were down. You refused me to give the scan link of the crypt, so I'm not responsible if you don't give me a proof that the crypt was or not was FUD.

4) I didn't change anything on your botnet someone should have changed it, you just need to reset the password on the database side btw to get access back. You've cpanel so you're in the power of anything on your website.

So your only issue is he provided you a non fud file which you need to prove.

@blatngu Invest some money in paid scanners such as dyncheck.com

Sure I will send a link to the stub file. Maybe if you learned how to read with that big fucking head of yours you would see that he has changed the password to the login as well completely rendering his services useless. Adding to dispute db now.

Also he lied about the version he gave me and sent me several backdoored links.

Lol I came here to help you out and you are being a dickhead just because I gave you -4?

You have no proof's that he did that and he clearly told you that you can get access back and even check logs in cpanel unless you are a retard.

Maybe you should post a malware analysis before talking shit out of your fucked up mouth.

Or maybe you should go mind your own fucking business lmfaoo? I don't give af bout your -4 that why I blocked you. You have no clue how this deal went down.]

Let's not forget what happened the last time you tried doing detective work LMFAO:

Lol you are so salty dude, you've posted a dispute in a public forum, so i'll do what I want. Let me say this clearly your dispute is INVALID since you haven't provided any valid proofs against blatngu.

You asked for a service and he provided you, you broke his TOS by posting this dispute instead of solving this privately. You are not entitled to any refund.

Awhh what a jokester. See the funny part is last time I checked you have absolutely no clue how this deal went down and are taking sides simply due to the fact that you're mad I neutraled and ignored xD

No, I have all information about your dispute.It's just you who's acting like a dick here and I'm not taking anyone's side. Your chat clearly shows that you are an impatient 16yo who can't even setup his rat properly and pays someone else to do it for him and then tries to scam him by whining about the issues he got.

Lmfao, you would rather support a serial scammer than the person who got scammed, shows what a fucking cunt you are. I did not receive my service, the file was not crypted and the password was changed to login and to top it all off I've been ignored. Definitely my fault you clown, feel free to keep spamming though, every post being ignored & reported from here on out.

So whose fault is it that we don't know how the deal went down? ?

Post images to back up your accusations. Images of the stub getting detected, him threatening to cut off your support, etc.

Honestly, the reason I haven't bothered is because this guy is a serial scammer and I'm hoping he resolves these simple issues before I have to elevate again.

You can't get mad that people aren't taking your side if you haven't bothered to upload images for proof yet

It's not like you take the right sides anyway, even when there is proof.

Where did you say you don't care?

All I see are posts directed at J.P. that make it seem like you do care.

So how about you keep your mouth shut before accusing him as a serial scammer?

Why did you even bothered to make this dispute if you don't care?

I feel like you have a tenuous grasp on the concepts of "right side" and "proof". Regardless even if I was consistently wrong what does it matter? I have no power on HF

SIM-1589588 - June 10, 2018, 9:11 am

I'm done with this dispute. @OP I doubt anyone is going to support you with that attitude. Currently you are just talking shit without providing any valid proofs.

Wires - June 10, 2018, 9:15 am

So OP is basically saying that they won't upload proof of a scan or even the defendant withdrawing support because they hope the defendant will do the right thing, even though that said proof will validate the whole dispute? ?

Well, it looks like HF users are getting dumber by the day.

There is a big difference between making an accusation and a statement clearly you're a scammer sympathizer. gtf.

This is what happened last time this clown thought he was a detective LOL:

Dear Maxo,

I've resolved all those dispute and they are old, I'm highly happy to fix a error for my customer if some thing goes wrong if they have the RIGHT attitude and don't act like a kid who get mad in I don't reply in 1 hour.

And if you're wondering No I won't help you if you continue to act like a crying kid, it's all up to you, I don't do deals with kids that's my business.

Now have a nice day. First demonstrate me some proofs about the scan, that's a good point to start the fixing of this dispute.

Oh almost forgot, don't speak if you don't know shit ?

Received Non-encrypted stub

Sent me betabot 1.7 instead of 1.8 like promised

You recovered panel login details

You clearly have issues if you think you aren't scamming, I warned you several times about dispute too and btw those are OPEN UNRESOLVED disputes quit lying Imfao.

One was resolved, the other you were forced to take an L because you lost the PP dispute to a moron. Lol

@OP just update everything with Proof and you should be fine.

Indeed after that I sent you the crypted stub, that was an incident, you got the crypted stub so I'm not scamming you.

And I didn't recover any details, I don't waste my time to have changed the password for unable you to log in.

Here's my deal:

I'll reset the login for you, then I don't want to hear from you for the rest of my life, I don't like skid. Oh and also you will need to close this dispute.

Heres my verdict:

User got impatient because vendor didn't reply ASAP, without user uploading screenshots all users credibility was gone
